

The Charismatic Charlie Wade Chapter 3851

As for all magical implements, the strength of their efficacy is closely related to three aspects.

One is the material used for refining the method.

The better the material, the stronger the refining tool, which is the same as the sword casting. The better the steel used, the higher the sharpness and rigidity of the sword;

The second is the refiner's own ability.

The stronger the aura and the higher the cultivation level, the stronger the magical artifacts that can be refined, just like the gap between ordinary people and swordsmiths, insurmountable.

As for the three, it is naturally the user's own strength.

All magical instruments are by no means a perpetual motion machine that can be used indefinitely.

Take the Thunder Order for example. There are two types of magic weapons of this kind. One is that the refiner directly injects aura into the Thunder Order. This type of Thunder Order can be used by people who have no cultivation skills as long as they know the formula. .

But in this way, how long and how many times it can be used, it completely depends on the amount of aura contained in the thundering order.

The principle is the same as the squirt gun. How much water can be squeezed depends not on who uses it, but on how much water is stored in it.

There is another type, the refiner uses aura to refine the thunder talisman into the thunderbolt, and every time it is used, the aura must be injected into it to be activated.

Now Charlie, the spiritual energy in his body is quite pure, so he plans to refine the Soul Piercing Blade in the second way.

As a result, this soul-piercing blade can only be used by himself, and no one else can stimulate it.

However, the best refining material Charlie has right now is the remaining clams.

Otherwise, there is no other choice.

So Charlie used the remaining part of the clams to refine a soul-piercing blade for himself.

In the Soul Piercing Blade, Charlie superimposed ten layers of Flying Blade Talisman, so that the power of Soul Piercing Blade was relatively more controllable.

After the soul-piercing blade was refined, the whole body was almost the same length as Claire's lipstick, and it looked like a flying knife carved out of a shell.

No matter who sees it, it will feel that it is just a small handicraft, and no one will use it as a weapon.

In order to test the power of the Soul Piercing Blade, Charlie drove to the Champs Elysian Hot Springs alone, and went straight from the half-hill villa to the back. After climbing a few mountains, he came to a lush and uninhabited valley.

In this valley, Charlie only inspired a layer of flying blade charm, and felt an invisible sharp blade made of spiritual energy whizzing out from the tips of his fingers, instantly cutting off the thick cypress tree in front of him!

Seeing a dense tree suddenly cut diagonally, and then the upper half of the trunk with dense branches collapsed. In an instant, a large number of birds flew up from the leaves, and a few squirrels were also scared. And escape.

Charlie himself was shocked by this powerful power, but this is not over yet!

After the sharp blade cut the first cypress tree, it continued backwards and cut three large trees one after another. When it reached the fifth large tree, the power of the soul-piercing blade was reduced a lot, and the trunk of this tree was cut in half. This finally dissipated!

In front of Charlie, four big trees collapsed suddenly, and a large area was vacated in the dense woods in an instant!

Charlie looked at the scene in front of him, then looked at the harmless clam knife in his hand, and muttered to himself: "This thing is so powerful on only one layer. If it has ten layers, wouldn't it be necessary? Cut down dozens of big trees in one go?!"

Charlie didn't know what effect would it have if the strength of cutting dozens of big trees in one fell swoop was applied to metals and rocks.

So he immediately searched for a huge boulder the size of an adult elephant, and suddenly used ten layers of Soul Piercing Blade at a distance of several tens of meters.

At this moment, he only felt as if 30% of the aura in his body had been taken away at once, and then, a burst of powerful aura suddenly burst out in front of him!

After a while, the huge boulder was like being detonated by explosives from the mountain, with a bang, it was completely broken into countless broken stones and flying in the sky!

For a while, the broken rocks and dust filled the surrounding area, covering the sky and the sun!

Charlie stood on the spot, and withstood a burst of gravel rain that lasted for a few seconds. Each piece of gravel carried a great strength, marking Charlie's clothes in ragged clothes!

Fortunately, his body has been strengthened by aura and a large number of rejuvenation pills, and it has long been as strong as steel, otherwise he would really have to be hit by his own strike just now!

After the gravel rain fell, Charlie looked at the original location of the huge boulder in a daze. It was a huge situation before, but now it was empty.

And the mountain behind the boulder was also smashed into a big hole about one meter wide and about three to four meters deep!

Charlie was shocked, but also overjoyed!
