

Chapter 5157

The mining location of this copper mine was located underground at a depth of about five hundred meters or so.

Charlie let Leroy, as well as the people under his control,

Lead the crowd together and take the elevated cage to the dead man's quarters.

As they made their way down, Leroy introduced the specifics of this copper mine to Charlie.

After decades of continuous development, the interior of this copper mine had become extremely intricate and complex.

It consists of a total of three parts, the first was the normal mining part of the copper mine,

Including the tunnel and mining surface; the second, the part where the dead soldiers and their relatives lived;

And the third is the part where all the supplies and equipment were stored.

From the mouth of the shaft down to the very bottom,

In fact, just down to the working face of the copper mine.

After going down, it can be seen that this is a very standard medium-sized copper mine,

All the facilities and equipment are required for production, no abnormalities can be seen at all.

Led by Leroy, Charlie walked out of the cage, looked at the deep mine tunnel,

And curiously asked, "Where do the dead soldiers and their relatives usually live?"

Leroy hurriedly said, "Back to Mr. Wade, this plane at an altitude of minus five hundred meters,"

"Is all the working surface of the copper mine, the area where the dead men live,"

"You have to go in through a hidden dark tunnel in front and take another lift cage to go down another hundred meters."

Charlie nodded and asked him, "Why is no one working here now?"

Leroy answered: "Because today is the time to take the medicine,"

"So the dead soldiers have to be driven away early back to the living area of minus six hundred meters as ordered,"

"So that they can wait there for the antidote to be delivered and take the medicine together."

Saying that he added: "Under normal circumstances,"

"Only the dead soldiers working in the copper mine and the families of the dead soldiers,"

"Are qualified to come to this level as miners,"

"Others have been staying in that level below and only have the opportunity,"

"To come out when they are selected to go on a mission."

Charlie asked, "How do you usually manage these dead soldiers who act as miners?"

Leroy said: "There are a total of three teams of miners, each team about a hundred people,"

"Working in three shifts, the specific management method is the same as the United States prison management work,"

"With each shift up, there will be a special group of Cavalry guards responsible for this shift in advance of the count below,"

"And then personally bring them up to work, and the Cavalry guards above will also be on time to count the number of their own management shift,"

"To determine the number of shifts with the change of shift."

"After making sure that there is no difference between the number of people on duty and the shift change,"

"They will hand over with another team that comes to hand over the shift,"

"And after the number is verified correctly, send all the people of this shift back,"

"And count the number once more after reaching the layer below,"

"And after confirming that it is correct, the miners of this shift will go back to rest,"

"And the Cavalry guards who are responsible for supervising them will also go back to rest."

Charlie asked him, "Is there any extra pay for the dead soldiers who act as miners and their families?"

“No.” Leroy shook his head, “According to the organization’s requirements,”

“We will only select those dead soldiers and their families who are not strong enough to perform labor,”

“And will not give any additional compensation.”

Charlie nodded gently.

At this moment, Leroy had already led him and the others to a room that said power distribution room.

After entering the room, the first thing that jumped into the eyes was the well-organized circuit equipment,

But as Leroy operated a set of power distribution cabinets on the wall for a moment,

Immediately after that, the whole wall suddenly opened slowly inward.

Charlie was able to see from the side of the door frame, the door disguised as a wall,

The thickness of almost nearly one meter, and both sides are very thick steel plate reinforcement,

Not to mention martial arts experts, even for ordinary heavy firepower, it is impossible to blow this wall open.
