

Chapter 683 The Conflict On The Island

Liam was oblivious to the unfolding scheme.

Just as other formidable forces did, he traced the path lit by the signal and hurriedly advanced towards the heart of the island.

His journey was punctuated by endless mountains. Despite the breathtaking vistas, the trek grew monotonous. Plus, Liam had pressing matters to attend to; there was no time for sightseeing. He pressed on relentlessly, not pausing for a breather.

It wasn't until he crossed a small village that he overheard a heated argument, compelling him to halt. Clearly, tension was brewing.

A rude female voice filled the air.

"Javier, keep your nose out of my affairs! Move aside!"

Standing before her, Javier looked visibly annoyed.

"Miss Sandoval, we're all here for the same reason. It is to find the rare-earth mine. Why resort to this?"

Seizing the locals' grazing lands by force, even threatening their lives? You're crossing a line."

"Humph! Those bumpkins are no better than livestock. If the Ramirez family doesn't want to meet the same fate, step aside!" Adelina scoffed.

A surge of indignation flickered in Javier's eyes.

The Sandoval family might be influential, but the Ramirez family, being one of the four major clans, was far from intimidated. Adelina's words were nothing less than a blatant insult and challenge to the Ramirez name.

Yet, despite the palpable tension between them, neither party initiated any action.

The complicated situation on the island meant that a hasty move could severely jeopardize their respective agendas.

Upon hearing the argument, Liam quickly grasped that the opposing parties were the Sandoval and Ramirez families.

As the standoff continued, members of the Shipwreck Organization on the island took notice of the commotion and encircled them.

The cornerstone of the Shipwreck Organization was unity.

Julie was among them.

She had undergone a significant transformation;

wearing plain clothes provided by the Shipwreck Organization and her face veiled, she blended in effortlessly with the crowd. At a cursory glance, she appeared to be just another native islander.

Leading the group was the old lady who had rescued Julie. She leaned on an ornate cane, lending her an air of authority despite her disheveled appearance.

Standing next to her, besides Julie, was another veiled woman.

Members of the Shipwreck Organization knew her as Sarai Lyons. Though deaf, Sarai was fluent in sign language and could speak, often serving as the old lady's spokesperson.

Sarai conveyed the old lady's message. "You've overstepped your boundaries, newcomers! We'll let it slide just this once. Consider the livestock you've consumed as a welcome gift from us. Now go."

Upon hearing this, Adelina was momentarily speechless, then erupted into laughter. "You're threatening me? That's ridiculous. Seems like you've been isolated on this island for too long and have lost your wits."

Adelina didn't bother to hide her scorn. As a member of the Sandoval family, she found it utterly absurd that these mute or deaf islanders would dare to

challenge her.

It was as if they thought they were lords of the land
just because they lived on this tiny island!
