

The Ex-Husband's Revenge By Dragonsky

Chapter 2441

Chapter 2441

Meanwhile, the Dragon Guards were tracking the Southern Boss down for allying with the Demon Lord and Hades.

On top of that, the Thompsons were still determined to avenge Yonas's death, so the Southern Boss would not return to the southern region so long as he did not fully recover.

At this time, it would be much safer for the women to remain in the southern region.

"But," Iris and the others fell into silence when they learned that the Southern Boss was likely in the western region.

Instantly, they all realized why Leon was insistent on going alone.

They were hardly powerful enough and if they followed him to the western region, they would only slow him down and Leon would struggle to protect them all by himself.

"Iris, just wait for my updates here in the southern region for now! I'll try to track the Southern Boss this time to see if I can fish him out. If I can find him, I'll get rid of him for good!" Leon said.

He was in the invincible Intermediate Almighty State the last time he fought the Southern Boss.

After training for the past weeks, he reached the Advanced Almighty State in sage art.

On the other hand, the Southern Boss was severely injured by Alfred and Leon, so he was likely still recovering.

If Leon ran into the Southern Boss again, he was confident that he could get rid of him even without the Potential Energy Force.

Naturally, it wouldn't be a big issue if he failed to find the Southern Boss.

Henry and the others were training with the Heavenly Stars Method, so Henry and Chandler would soon reach the Advanced Almighty State. Once they were done with their training, they would be more than capable of protecting Iris and the others, and they could all travel to the western region then.

"Oh, alright, then!"

"Leon, the Southern Boss is formidable and cunning, so you need to be careful when you're alone in the western region."

Iris, Cynthia, and the others cautioned.
