

## Chapter 1292 Absorbing More Life Force

After controlling the two warriors from the Insect Clan, Liam refrained from immediately using his life-draining Origin Technique to absorb their life force and primogem energy.

Instead, he rushed closer, clashing physically with them.

The close-quarters combat allowed Liam to absorb energy that was better than the energy he would absorb using his life-draining Origin Technique.

Protected by his earth elemental shield, clad in Mortal-grade armor, and with his bronze-transformed body, Liam could easily withstand any attack the two warriors of the Insect Clan could unleash with their full strength.

So, he was not worried about getting hurt at all.

Liam continued his merciless assault, simultaneously using the life-draining Origin Technique to siphon their life force and primogem energy.

The warriors from the Insect Clan, small in size, possessed only a scant amount of life force.

As Liam drained their life force, their strength visibly waned.

It was then the two warriors from the Insect Clan realized the full extent of Liam's power, far exceeding their initial estimates.

Panicked, they cried out in despair, "What... What have you done to us!"

Liam, unmoved by their distress, intensified the life-draining process.

"Be consumed!"

As their life force rapidly diminished, the two warriors from the Insect Clan fell into despair.

But they were unwilling to give up; they decided to attack one last time. Even if the gravitational magnetic field would crush them if they didn't use all their strength to withstand it, they attempted a desperate attack.

Their weak attack was significantly diminished by Liam's earth elemental shield and Mortal-grade armor. When it landed on Liam's bronze-transformed body, it almost had no impact on him.

They watched helplessly as their life force was relentlessly siphoned away by Liam.

Stripped of their life force, their bodies quickly dried out.

Now energized by the absorbed energy, Liam moved closer to achieving the level of Primogem Expert.

A surge of elation swept through him; his theory was confirmed now.

The enhanced life-draining Origin Technique proved to be a powerful means to bolster his strength by extracting the life force and primogem energy from his enemies.

With this insight, Liam was excited as he surveyed the vast amount of enemies from the Insect Clan on the battlefield of No. 108 planetary system.

He speculated that absorbing the life force and primogem energy of several dozen skilled warriors from the Insect

Clan could catapult him to the Primogem Expert level!

Such a breakthrough would also accelerate the development of his emerging law power.

With this goal in mind, Liam activated his Malicious Aura Domain, preparing for a significant exertion.

Malicious Aura Domain expanded, strengthened by the law power of the Cosmic realm, its influence stretching a large area.

The area also covered people from the Human Clan. But within this area, Liam distinguished friends from foes, protecting his human allies, ensuring the Malicious Aura Domain wouldn't hurt people from the Human Clan.

The sheer force of Liam's aura, forged from countless victories, was evident to all. Even the esteemed Primogem Kings, despite their impressive stature, didn't possess such a potent malicious aura.

When the Primogem Kings noticed that Liam was only at the pinnacle of the tenth level as a Primogem Warrior, they were shocked.

They couldn't understand how Liam had gotten such a malicious aura.
