

Chapter 1295 The Primogem Emperor Of The Blood Clan

After Liam made a move, the pressure on the Primogem Experts of the Human Clan instantly decreased a lot.

Because of Liam's breakthrough, the situation on the battlefield had changed. The Human Clan started to be in the ascendant.

Everyone was shocked. If they hadn't witnessed it with their own eyes, they wouldn't have believed that a man merely at the Primogem Expert level could change the battlefield situation of the entire planet.

But Liam had indeed done it on his own!

The Primogem Experts of the Human Clan, including the Primogem King, Myriad, hiding in the dark, were all dumbfounded.

The crowd was utterly shocked.

They all wondered what kind of genius Liam was.

He had just reached the Primogem Expert level. How could he have such an amazing combat capability?

While the Human Clan was surprised, the huge army of the Insect Clan, who always believed victory was theirs, was now terrified.

They quickly analyzed the situation.

After knowing that the Human Clan had a genius with top-notch combat capability, the Insect Clan realized they no

longer had any advantage.

They knew very well that if they continued to fight like this, they had no chance of winning. So, the Insect Clan army prepared to retreat.

However, Liam wouldn't let the Insect Clan go easily.

When he saw that the Insect Clan army was about to retreat, he frowned.

Were they thinking about fleeing now?

It was too late!

Liam's eyes turned cold and fierce. He instantly employed an extraordinary gravitational magnetic field on the Insect Clan army, making their escape speed extremely slow.

When the other Primogem Experts of the Human Clan saw Liam do this to the hateful Insect Clan army, they were first stunned. They were surprised by Liam's extraordinary method.

Then, they reacted quickly. They took advantage of the situation and quickly began to fight the Insect Clan army.

They were determined to annihilate the Insect Clan army.

However, when everyone thought the situation was already under their control and that the Insect Clan army could no longer threaten them, Liam's brows furrowed tightly.

The countless battles he had experienced had honed his senses. He immediately felt danger approaching.

Liam's face turned pale with fright when he felt he was targeted.

Liam quickly shouted to the Human Clan members in front

Chapter 1295 The Primogem Emperor 🎁 +120 Points at most of him, "Everyone, retreat! There's danger coming!"

Liam's voice rang out in everyone's ears. They didn't understand how Liam could be so sure that danger was coming. But the strength and talent Liam had shown in this battle made them respect him. Thus, they believed him.

They quickly stopped chasing the Insect Clan army and followed Liam's order to retreat.

However, although they immediately retreated, it was still too late.

A strong warrior from the Blood Clan suddenly appeared above the No. 108 planetary system.

Everyone looked up, and they were even more shocked at what they were seeing.

The warrior who had suddenly appeared was actually a Primogem Emperor of the Blood Clan.

Such a powerful warrior was almost invincible on this battlefield.

On the entire battlefield of the No. 108 planetary system, the majority of the Human Clan were at the Primogem Expert level. Only very few of them were at the Primogem King level.

Needless to say, the Primogem Emperor of the Blood Clan was a big threat to them.

The target of the Primogem Emperor of Blood Clan was Liam!

Liam's scalp tingled, fear surging in his heart.

No matter how talented he was, he couldn't defeat a Primogem Emperor.

Before he could be overwhelmed by fear, Liam suddenly thought of the message-conveying token Caden had given him before he left. He took it out and tried to establish a connection with Caden.

The Primogem Emperor of the Blood Clan stared at Liam for a while. Then, he said coldly, "You are doomed."

Liam's heart sank.

He glanced at the Primogem Experts of the Human Clan, who were about to rush over to help him. He hurriedly shouted, "Don't come near me!"

However, the Primogem Experts of the Human Clan didn't listen to him this time. They rushed forward without hesitation.

Even though they knew their efforts would be in vain, they did not hesitate to protect Liam.

Liam was a real talent of the Human Clan. How could they let him die?

Even if Liam would die, they couldn't let him die before them.

Upon seeing this, the Primogem Emperor of the Blood Clan sneered, "Get out of my way!"

The Primogem Experts of the Human Clan were smashed into pieces by the Primogem Emperor of the Blood Clan effortlessly.

Liam felt like his heart was bleeding with sorrow, and his eyes were bloodshot.

"Stop!" he suddenly shouted, rushing forward with the sword of darkness. Even if his attack couldn't harm the

Primogem Emperor of the Blood Clan, he didn't care.

Just as Liam thought that he couldn't survive, a Primogem King, Myriad, suddenly appeared.

Myriad hadn't made a move before because he had been reporting the situation to Caden.

He had witnessed the shocking decision of the Primogem Experts of the Human Clan.

Myriad attacked the Primogem Emperor of the Blood Clan with a serious look in his eyes, shouting at Liam, "Leave! Hurry up!"

Myriad was only at the Primogem King level. He was not a threat in front of the Primogem Emperor of the Blood Clan.

"Fuck off!" the Primogem Emperor said.

Myriad tried his best, but he still couldn't stop the Primogem Emperor.

He wasn't even able to withstand a single blow from the Primogem Emperor of the Blood Clan. He was directly thrown into the air.

Then, a loud bang echoed on the battlefield. Myriad was blown into pieces.

The gap in the strength between a Primogem King and a Primogem Emperor was clearly unimaginable.
