

Chapter 1213 Fight

The president knew Liam well. He knew that since Liam had made that statement, he likely already had a plan in mind.

Brimming with optimism, he asked, "Liam, do you have a solution to this problem?"

Without withholding any information, Liam nodded with a smile and replied, "Master, I've convinced the master of Blue Star. We've agreed that as long as I can take her away within one thousand years, she'll turn off the signal that she has broadcasted. Once it's turned off, no beings outside Blue Star will be able to enter. This means that if we're able to successfully eliminate the Saint Society members on Blue Star, it will most likely usher in at least a thousand years of peace to Blue Star!"

As soon as Liam finished speaking, he noticed the shocked expressions on the faces of the president and Carlden.

The pair exchanged glances, then simultaneously let out a sigh of relief.

They hadn't expected there to be such a big secret behind the imminent disaster that Blue Star was facing.

Now that they understood why Blue Star had been exposed to the Cosmic realm, they could address the huge crisis.

Pleased with Liam's arrangements, the president gazed at him with satisfaction. Then, he turned to Carlden and said, "Carlden, fight with Liam to see how powerful he is now.

"It'll help prepare him to challenge the Lord of the War God House for the position of president!"

Upon hearing this, Carlden nodded solemnly.

Without hesitation, Liam smiled at Carlden, silently agreeing to the fight.

Carlden also smiled, his appreciation for Liam evident in his eyes. He left Mount Moria with Liam and the president and headed for the wilderness.

Liam and Carlden stood on two different mountains facing each other.

Carlden said to Liam telepathically, "Be careful, Liam! I won't go easy on you!"

Liam nodded.

Meanwhile, the president, who was floating in the air, said, "No need to hold back, both of you! I'm here. I'll make sure things don't get out of hand. Don't worry about losing control!"

Upon hearing his master's words, Liam nodded once more. Turning to Carlden, he said, "You also need to be careful, Carlden! Don't underestimate me!"

Carlden didn't take Liam's words seriously. After all, even on the surface, he was at level eight with six stars.

He was exceptionally powerful, even among all the eighth-level Primogem Warriors.

Besides, Carlden had mastered the special power of the space element. His movement was unpredictable, and both his speed and attack were unparalleled!

Confident that he would defeat Liam, he yelled abruptly,

"Watch out, Liam!"

Just as he finished speaking, Carlden sprang into action.

Relying on his absolute advantage in speed, Carlden appeared behind Liam in a flash. The next moment, he launched an attack.

The moment Carlden appeared behind him, Liam sensed his presence.

Not to be outdone, Liam condensed a giant with his special power of life energy at the same time.

In an instant, his front and back were both guarded. Liam didn't relax for a moment because of this, maintaining intense focus.

In fact, Liam's spiritual power had already reached the level of an eighth-level Primogem Warrior.

As a result, with his spiritual power, it was easy for him to track Carlden's movements.

He and the giant then used two beams of light to penetrate the shadow left by Carlden on the ground.

At the same time, Liam utilized the gravitational magnetic field. He bound Carlden's figure with his spiritual power.

Despite the gap in strength between Liam and Carlden, Liam's multiple techniques caused Carlden's figure to slowly become condensed!
