

Chapter 1311 A Being Even More Powerful

When the Dark Mist King materialized, Liam instantly understood why so many Dark Mist Spirits had recently surged into the No. 76 resource planetary system.

These Dark Mist Spirits were indubitably linked to the Dark Mist King!

What astonished Liam the most was that the Dark Mist King had achieved the formidable level of a Primogem Emperor. It was unimaginable how long it had been lurking in this planetary system unnoticed!

Such a formidable alien had infiltrated the Human Clan without any detection!

However, Liam had no time to dwell on these thoughts now, as the Dark Mist King had already fixed its menacing gaze upon him.

Disregarding Jason and his followers, it charged directly at Liam!

Liam whirled around, a chilling sensation creeping down his spine.

Under normal circumstances, Liam might have cursed aloud in frustration. Of the three present, why did it target him?

Ever since his encounter with the Primogem Emperor of the Blood Clan, Liam had realized how trivial his strength was against adversaries who had the strength of a Primogem Emperor.

During that clash, he had exerted all his might yet still failed to repel the Blood Clan's Primogem Emperor's attack.

Had it not been for Caden and Christis' timely intervention, he would have died.

Even though the Dark Mist King had just become a Primogem Emperor,

Liam knew he was outmatched in his current condition.

Moreover, he had lost the energy replenishment from the Heart of Life fragment within him, and Emer lay in deep slumber, leaving him devoid of any guidance.

Liam inhaled deeply, channeling his special power of the light element into his Lightning Wings.

With this infusion, his Lightning Wings' speed soared, propelling him forward in a desperate escape.

Yet, he couldn't escape the relentless pursuit of the Dark Mist King.

"Damn it! Why is this thing so fixated on me?" Liam muttered.

Despite pushing his Lightning Wings to their limits, he couldn't evade the persistent pursuit of the Dark Mist King.

A sheen of cold sweat glistened on Liam's forehead as panic set in.

He knew, with a sinking feeling, that it was only a matter of time before the Dark Mist King would catch up with him. There would be no chance of escape for him if that happened.

As despair began to cloud his mind, Liam discovered a dense, ominous cloud of black mist ahead, ominously blocking his path.

These were the Dark Mist Spirits summoned by their king to block his path.

Seeing his way blocked and the enemy closing in from behind, Liam felt despair sinking in his heart.

There was no way out!

But he didn't want to just give up.

Seizing a fleeting opportunity, with the path not yet fully obstructed, Liam swiftly unsheathed his sword of darkness. The blade hummed as he channeled the law power of the earth element into it.

He planned to launch a desperate attack.

Even if he couldn't survive, he would make the Dark Mist King pay!

A fierce battle intent ignited in Liam's heart as he roared, "Die!"

Just as he was poised to strike, a beam of radiant sword light burst forth from the distant horizon.

The light, infused with immense power, cleaved through the sky and split the Dark Mist King in two!

Stunned, Liam watched as the Dark Mist King fell, slain by this enigmatic sword light. He was utterly shocked.

Could it be that there existed a being even more powerful than the Dark Mist King within the No. 76 resource planetary system?
