

Chapter 1324 The Formidable Gold Devourer

Utilizing a gravity magnetic field combined with the special power of the light element, Liam mustered all his strength to finally subdue the ferocious Gold Devourer.

Under the intense pressure, the beast's movements slowed drastically, and it emitted a fearful roar in its panic.

Seizing the opportunity, Liam drew his sword of darkness and, with a swift leap, plunged it into the beast's skull, ending its life.

As he stood over the defeated Gold Devourer, Liam was shocked. The battle just now had forced him to deploy nearly half of his techniques!

Typically, as a third-stage Primogem Expert, Liam could defeat a ninth-stage Primogem Expert using just half of his capabilities.

After all, the effectiveness of his sword of darkness and his robust defense were not just for show.

This encounter with the Gold Devourer, however, had drained the last vestiges of complacency from Liam.

He recognized that he would need to use his full power in future encounters with a Gold Devourer.

Meanwhile, Chad and Everett were also astounded, but for different reasons.

They marveled at how Liam, only a third-stage Primogem Expert, had managed to kill a Gold Devourer at the eighth

Chapter 1324 The Formidable Gold [🎁 +120 Points at most stage of the Primogem Expert level.

After all, the beast's strength far surpassed that of a human warrior at the same level, and beyond the Primogem Expert level, the strength stratification was markedly different from the Primogem Warrior level.

At these higher levels, one must understand a portion of the law power corresponding to their realm to enhance their abilities.

The gap here was quite significant.

Despite comprehending just 3% of the law power, Liam had astonishingly bridged a five-stage gap to slay the Gold Devourer.

This feat left Everett and Chad in sheer disbelief.

They exchanged looks, each recognizing the shock reflected in the other's eyes.

Their understanding of their world's power dynamics had been fundamentally altered by Liam.

Liam approached the lifeless Gold Devourer and began a thorough search.

He needed to collect three pieces of Feathered Gold for his mission, so he wanted to find the Feathered Gold on the Gold Devourer's body.

However, the search yielded no Feathered Gold, leaving Liam feeling disappointed.

He had assumed that since the Gold Devourer fed on Feathered Gold, it would surely possess some.

Unexpectedly, this Gold Devourer carried none.

Everett, observing Liam's thorough search, could guess his thoughts and offered an explanation with a smile. "Feathered Gold is an incredibly rare metal ore. Even within this secret realm of Feathered Gold, it's a rare and precious resource. Although Gold Devourers consume Feathered Gold, a single piece can sustain it for a month. Before, I spent a long time searching this secret realm and only managed to collect six pieces of Feathered Gold."

"I see." Liam nodded.

He hadn't anticipated it would be so difficult to obtain Feathered Gold.

But he was not discouraged. He asked Everett, "Where might I have a chance of finding Feathered Gold?"

Everett paused, considering the options, and then replied, "The most straightforward method is to search the nests of the Gold Devourers. Since they feed on the Feathered Gold, they are likely to store some in their nests. However, venturing into the Gold Devourer's nest carries significant danger. The decision to go there is ultimately yours."

Liam was not one to shy away from a challenge, knowing that great rewards often came with great risks.

"With the Feathered Gold at stake, the risk is certainly worth it!" Liam declared, determination clear in his eyes.
