

The Amazing Son-In-Law

Chapter 3201-3204

Chapter 3201

Commander Hamid never knew the way Dragon Hall cooperated with the government forces.

Originally, he thought that it was the government army that paid for the hiring of the Dragon Hall, but after thinking about it carefully, he always felt that something was not quite right, because the biggest problem of the government army was the shortage of funds.

With fewer guns, how can there be enough funds to hire the mercenaries of the Dragon Hall.

It was not until yesterday that he received the news that it turned out that the conditions for cooperation between Dragon Hall and the government forces were that Dragon Hall helped the government forces to clear out the opposition, and the government forces allocated a piece of land with an area of 100 square kilometers in Syria to Dragon Hall, for them to build it's first mercenary base in the middle East.

But Commander Hamid didn't expect that Charlie would even know about this in China, so he was shocked by Charlie's information.

Charlie didn't expect that Commander Hamid had already fought with Dragon Hall for two rounds, and he didn't know the news until yesterday.

This also means that the news is relatively confidential.

Lord Banks would know this kind of confidential information.

This further confirmed Charlie's guess that Lord Banks must have some connection with Dragon Hall.

So, Charlie said to Commander Hamid, "I suspect that this Dragon Hall is related to an enemy of mine in China."

"The specific details of Dragon Hall's cooperation with the government army are leaked from the enemy in our country."

Commander Hamid blurted out, "Brother, if you say so, then this Dragon Hall also has a certain threat to you!"

"Yes." Charlie nodded and said, "The main reason is that I don't know much about Dragon Hall."

"I don't know their specific situation, so it's not certain how dangerous Dragon Hall is for me."

Commander Hamid waved his hand and said, "Brother, I don't think you have to worry about this."

"China has always had the nickname of the mercenary tomb, because China's security is so good."

"In this case, overseas mercenaries can't even take a gun in, and it is absolutely not your opponent."

Charlie said indifferently, "Only when you know yourself and your enemy can you be invincible."

"What I am most passive now is that I lack knowledge of the Dragon Hall, and I don't know how close my enemy is with the Dragon Hall."

Commander Hamid said, "Brother, let me tell you what I know."

“Dragon Hall was established in South America in the early years.”

“Now it focuses on the Middle East and Africa.”

“Among them, the Middle East market is the largest.”

“If you think of it, almost no country in the Middle East, including Israel, does not cooperate with mercenaries, so this Dragon Hall wants to take root in the Middle East.”

As he said Commander Hamid added, “The biggest problem of most mercenary organizations is that there are no heavy weapons.”

“Even the American Blackwater Company can only arm mercenaries with ordinary light weapons.”

“When they go to the Middle East to cooperate with the U.S. Army, the armored vehicles and helicopter gunships are almost all of the U.S. military.”

“If they leave, the best equipment they can get in the Middle East is a Toyota pickup truck with machine guns on the bucket.”

“At this point, the same is true of Dragon Hall;”

Chapter 3202

“Although they have some heavy equipment in South America, they are also said to have only a small number of armoured personnel carriers, as well as old Russian helicopters.”

“If they want to dispatch these equipment globally, they can only use shipping methods;”

“But there is another problem with shipping.”

“Shipping companies all over the world must follow a basic convention that they cannot carry any non-governmental weapons and equipment, and the ports of any country can not allow any non-governmental weapons and equipment to be loaded and unloaded from ports;”

“So it’s basically unlikely that their gear wants to get from South America to the Middle East.”

When Charlie heard this, he said, “That’s why they want to build their own base in the Middle East, and then find a way to get some heavy equipment from here to arm themselves, right?”

“Yes!” Commander Hamid nodded and said seriously, “The war in the Middle East itself is a paradise for mercenaries.”

“Although I don’t know how much global output value the mercenary industry has every year, at least 60% is in the Middle East.”

Speaking of this, Commander Hamid added, “Although Africa is also chaotic, to put it bluntly, those war-torn African countries are all poor to death.”

“Mercenaries really can’t make much money when they fight in that place, but the Middle East is different.”

“Many countries in the Middle East are very rich, even Iran, which has been sanctioned for a long time, is in fact they are rich, and they all have mercenary needs and are willing to spend money, so it is a huge market for mercenaries.”

“In addition, there are a lot of heavy weapons and equipment in the Middle East, almost the exhibition

hall of eastern and Western weapons, among which Russian weapons and equipment are the most.”

“As long as you have money, there is nothing that you can’t buy.”

“If Dragon Hall really gets a base in Syria and then a batch of heavy equipment from the Middle East, the combat effectiveness in the Middle East will rise sharply in the future.”

“It will definitely be very popular.”

Charlie asked puzzledly, “Why do your government forces cooperate with them?”

“Aren’t they afraid that Dragon Hall will affect the security of your country in the future?”

Commander Hamid smiled and said, “For them, Dragon Hall is much better than us. After all, we are really doing with them.”

“That’s true.” Charlie paused for a moment and asked him, “By the way, do you know who is the supreme commander of Dragon Hall in Syria?”

Commander Hamid immediately said, “The Green-Eyed Wolf King, one of their four great kings, is said to be a Chinese.”

Charlie nodded gently and said lightly, “I’m going to find a chance, I will be there for a while.”

Commander Hamid blurted out nervously, “Brother, don’t be impulsive. I’ve heard that each of the four kings of the Dragon Hall is a top master, and they not only have the four kings, but also hundreds of star-rated generals.”

“Their strength is very strong. It’s too dangerous if you rush past!”

Charlie laughed and said, “I don’t know why. I always have a feeling that I may have a lot of intersections with this Dragon Hall in the future, and may even be a great enemy in my future.”

“If I were in China, it would be fine. Since I’m here this time, I have to find a way to touch their way.”

“In addition, I want to take Zayne away, and there is only one way to go, so I have to do this anyway, and it’s better to tie him up.”

Commander Hamid said anxiously, “Brother, there are at least 15,000 people around the Dragon Hall.”

“Even if the Green-eyed Wolf King is on the front line, he must be in the hinterland of their army.”

“I don’t know how many soldiers are there. It’s hard to find him in the army, not to mention you want to tie him out of the army.”

“Come on, isn’t it even more difficult?”

Charlie smiled, “It’s good that I don’t necessarily have to sneak into his army to find him.”

“I can completely swagger to see him.”

Commander Hamid exclaimed, “What?! Are you crazy?! “If you get out of here, their soldiers will definitely shoot directly, and will not give you a chance to speak at all!”

Charlie laughed and said, “Don’t worry, I haven’t finished yet.”

Speaking of this, Charlie paused slightly, and then said, "In this way, you will let the wind go today and say that you hope to have peace talks with them."

"The content of the peace talks includes but is not limited to shaking hands between the two sides, or surrendering to the Dragon Hall and the government forces if you are conditionally possible;"

"But as for the specific conditions of surrender, you need to sit down and talk with the Supreme Commander of the Dragon Hall face to face."

"I believe they will definitely be interested."

"When the time comes, you will tell them that you will send a negotiator to their site and consult with their top commander."

"And I am your negotiator!"

## Chapter 3203

Charlie felt that it was really unrealistic to let himself be in the Dragon Hall Army to search for the whereabouts of the opponent's highest commander, and even to control the opponent.

Aside from other things, he still doesn't even know who the other party's highest commander is and what he looks like.

By the time there are more than 10,000 people inside, even if he can sneak in smoothly, I am afraid it will be difficult to find each other and determine the identity of the other party within a day or two.

But thinking about this problem from another angle is not so complicated.

He can go straight to him.

When Commander Hamid heard Charlie's words, he exclaimed and said, "How can this work? Brother Wade, how can you take this risk when you die?"

Charlie smiled indifferently and said, "As your negotiator, I generously went to meet the other party."

"What's the death of this? Do you think they will kill me?"

Commander Hamid blurted out, "It's not without this possibility! The other party hates me to the bone now. Maybe it will really vent his anger on you!"

Charlie laughed and said, "No, thousands of years ago, our ancestors of China once said that the two countries fought and did not behead, and this is also a basic principle that all countries in the world have adhered to now."

"Just like the Geneva Conventions, since it stipulates that medical staff shall not be deliberately killed on the battlefield, all countries must abide by it."

"This basic principle, like what the two fascist countries that did not abide by any convention in World War II ended up, I believe you know very well."

With that, he added, "If the Dragon Hall can grow to its size today and take root in the Middle East, they will certainly abide by these basic principles."

Commander Hamid said, "But they may not be willing to talk to me."

“Their current idea is to fight with me to the end. It is said that they have already spoken out. As long as I am in my base, even a mouse, they will not let go.”

Charlie laughed and said, “No matter how much they say, it doesn’t make sense. The fact is that they are in this state of deadlock with you now, which is of no good for them.”

After saying that, Charlie continued to analyze, “This kind of deadlock seems to be detrimental to you on the surface, but in fact, the real disadvantage is Dragon Hall and the government army.”

Commander Hamid said sadly, “Brother, in fact, from the bottom of my heart, sometimes I don’t know.”

“My preparation time is not long enough, so the materials are not enough, far from the three-year strategic reserves you asked for before, and now the number of people has doubled.”

“Nearly 10,000 people here eat horses. Yes, it will Accelerate the consumption of materials, and it will last for a year and a half at most...”

Speaking of this, Commander Hamid sighed and said seriously, “Brother, I am the turtle in a jar to describe me in a Chinese idiom!”

Charlie smiled and said, “What is the turtle in the jar afraid of?”

Chapter 3204

“As long as the jar is strong enough, the other party can’t break your strong jar in a short time.”

With that, Charlie added, “And, you have to understand that your current situation is completely different from their situation.”

“Although you are trapped in the middle of the jar, this jar itself is your nest.”

“Even if you are just blocked in your own home. There is food and drink at home. What are you afraid of? Not only don't be afraid, but your quality of life will not decline any because of being trapped.”

Speaking of this, Charlie said with a moment and laughed, “But those who besieged you outside are not as happy as you.”

“The army of 20,000 to 30,000 people composed of Dragon Hall and the government army must stay here all the time.”

“It's windy and rainy, sunny and rainy. They can only hold on to your door. Who is more uncomfortable?”

When Commander Hamid heard this, his eyes suddenly lit up and excitedly, “Brother, you continue...”

Charlie smiled and said, “You see, it's like a group of fishermen running to the black fish pond to fish, eagerly want to catch the largest standard fish in the pond, but the big fish is hidden in the water, it just doesn't show its head. “

“The fishermen have no choice but to grin their teeth and set up a tent by the fish pond to prepare for a protracted war.”

“It's not okay to have a windy rain, windy meal, mosquito bites, and delay serious work.”

“You can't do hundreds of thousands of dollar a year, or millions of business a year in order to catch a fish, right?”

“Therefore, who can stand it for three or five days by the fish pond?”

“Even if there is a hardcore fisherman whose temper is very bad and can really grit his teeth, but by the time he persists for a week and the fish still has not come up, his wife might remarried the old man next door with her children.”

“What else can he do at that time?”

Commander Hamid said excitedly, “What a f\*ck, that’s the truth!”

Charlie nodded, “The cost for 15,000 people in Dragon Hall besieging you here is 10 million dollars a day, and this cost is completely pure compensation, but what if these 5,000 people are pulled to other battlefields?”

“Maybe the money earned can not only cover the cost of tens of millions of dollars a day, but also bring tens of millions of profits to Dragon Hall.”

“This is two tens of millions. Do you think they can afford to drag it?”

Speaking of this, Charlie smiled and said very firmly, “If Dragon Hall really dares to drag on with you for a year and a half, before your supplies are exhausted, they will go bankrupt.”

“Most of them are mercenaries. Mercenaries are no different from the workers of the construction team.”

“Whoever pays, he will do it. If they don’t pay or give less, they will definitely leave.”

“Did you think that the construction team worker has feelings for the construction site owner and is willing to continue to work for him if he can’t pay his salary?”

Commander Hamid laughed and said excitedly, "I understand! I really understand! The most passive thing now is not me, the turtle in the jar, but their gang of turtle-catching guys!"

Charlie nodded and laughed and said, "So I believe that Dragon Hall must be very worried now."

"If you suddenly announce that you want to talk to them at this time, they will certainly seize this opportunity."

"Even if they are not ready to really make peace with you, they will certainly seize this good opportunity and contact your people first, so that they can touch your attitude and explore your tone."

Commander Hamid nodded repeatedly and said, "My brother's analysis is reasonable! Then I'll find a channel to contact them to see if they want to negotiate peace!"

Charlie laughed and said, "When contacting, you must be full of sincerity and ask them directly."

"If they are willing to talk, you can send a person who represents you fully and go to their territory to talk to them in person, but you have to make it clear to them that your representative must talk with the Supreme Commander of Dragon Hall!"

Commander Hamid immediately stated, "No problem, I have a friend who is a supplier of government supplies and has a good relationship with the high-level government forces."

"I can ask him to help send a message!"The Amazing Son-In-Law

Chapter 3205-3208

Chapter 3205

The state of Ulysses Eisenhower of the Dragon Hall these few days is indeed they're extremely suffering, as Charlie guessed.

He thought that if the army was suppressing the territory and surrounding and not fighting, it would definitely bring huge psychological pressure to Commander Hamid and his men.

It would not take long for Commander Hamid to be distracted and even defected.

But to his surprise, after several days, Commander Hamid's side did not even run out of a dog.

In this kind of siege battle, the most fearful thing is that once the other party is not afraid, it will really be consumed indefinitely until Commander Hamid ran out of food, or he could not stand it.

In the past few days, his fiscal deficit is staggeringly high.

His adjutant found him and reported to him anxiously, "Commander, our daily expenses for our current 5,000 people is at least 30 to 40 million US dollars, in this way, our money will not last long."

The four kings of Dragon Hall all adopt an independent accounting mechanism, which is equivalent to each of the four people has opened a branch.

In terms of finance, they should achieve self-sufficiency and at the same time, they should also ensure profits.

If there is a deficit, they can only solve it internally.

When Ulysses Eisenhower heard this data, his whole expression was uncomfortable.

He gritted his teeth and said, "I can't continue like this."

"I order that from today on, as long as there is no war, everyone's salary will be halved!"

When the adjutant heard this, he said nervously, "Commander, everyone has been complaining recently."

"If you deduct half of their salary, I'm afraid they will protest collectively!"

Ulysses Eisenhower asked angrily, "What's wrong with these people who stay in the barracks all day long?"

"They don't have to fight, take risks, and pay the salary?"

The adjutant said awkwardly, "In recent days, everyone has a lot of negative emotions."

"On the one hand, everyone is extremely dissatisfied with the current food, and on the other hand, it is the problem of accommodation conditions."

"Yesterday, they also sent several representatives to complain to me and want me to solve it with you."

Ulysses Eisenhower said with a black face, "You explain to me one by one what they are dissatisfied with."

The adjutant rushed to say, "Let me tell you one by one."

"First of all, the problem is the problem."

“Now except for middle and senior officers, everyone else has the same dietary standards as the local government soldiers, even suppliers. The local diet is not suitable for the habits of our soldiers...”

“Our soldiers attach great importance to physical security, so their daily eating habits are more inclined to Western American, eating a lot of beef, vegetables, milk and even peanut butter and ice cream every day.”

With that, the adjutant said, “As for the accommodation problem, the main thing is that everyone is really not satisfied with the current march tent.”

“This batch of tents is patch-worked up everywhere by the government army.”

“Most of them have been placed in the warehouse for a long time.”

Chapter 3206

It is common for wind and rain leakage.

“Now it is the rainy season, so the tents are very humid, and the feeling of living is too bad.”

“What’s more, the power supply problem can’t be guaranteed at all.”

“The only few generating units can’t meet the needs of more than 30,000 soldiers on both sides to use together at all.”

“Therefore, now we can only use rotating power supply.”

“On average, each soldier can use electricity for an average of no more than four hours per day.”

“So everyone is now asking for a unified replacement of modular mobile board rooms and then ensuring 24-hour power supply.”

Ulysses Eisenhower scolded angrily, “Are these bastards coming to fight or on vacation?”

The adjutant said helplessly, “Commander, although they are here to fight, you know, they don’t like to fight hard battles themselves!”

With that, the adjutant said again, “The grassroots soldiers in our Dragon Hall are all the purest mercenaries.”

“They are desperate to train and fight for the sake of making more money to enjoy life.”

“Otherwise, who would like to take such a big risk to run out to do this kind of work?”

Ulysses Eisenhower had nothing to say for a while.

He is very clear about the current situation of Dragon Hall.

Although Dragon Hall does have four war kings and hundreds of star war generals, Dragon Hall has tens of thousands of ordinary officers and soldiers, almost all of which have joined Dragon Hall for profit.

These mercenaries have no loyalty to the Dragon Hall.

Everyone just thinks that the income, scale and popularity of the Dragon Hall are good, so they just choose to work for their lives in the Pantheon.

Therefore, these people will not endure humiliation and carry heavy burdens and forge ahead for the future of the Dragon Hall.

They only care about themselves.

At this time, his aide-camp added, "In addition, accommodation is actually understandable."

"Think about it, I don't know how long it will take for us to besiege, three or five days, or ten and a half days."

"It doesn't matter if the problem of power supply cannot be solved, but if this kind of day lasts for two, three months or more, then people certainly don't want to live in tents for these months..."

At this point, the adjutant warned, "Commander, summer in Syria will come soon."

"At that time, the temperature during the daytime is often 38 degrees or even 40 degrees, and everyone can't resist living in tents..."

Ulysses Eisenhower felt great pressure on the adjutant's words.

It is not difficult to solve the food problem.

He can buy food from Israel, whether it is steak or vegetable milk, and Israel can supply it steadily, which is nothing more than spending one million dollars a day.

However, this modular mobile board room is really difficult to solve.

Modular mobile board room, although the nature of the mobile board room used on domestic construction sites, is not a thing at all.

Not only is the construction process and supporting functions are more complicated, but also the manufacturing cost is also exponentially increased.

If 15,000 people are to live in such houses and have stable power supply, it will cost at least tens of millions of dollars.

Thinking of this, Ulysses Eisenhower had no choice but to bravely tell the adjutant, "Go back and tell them to them to endure again."

"After April 5, maybe Lord Creighton will come to Syria to solve these problems in person."

"In that case, everyone only needs to persist for more than a week at most!"

Ulysses Eisenhower moved out of Creighton Krueger, which was a temporary prevarication of the demands of the group, but he has also been struggling with it.

For him, he does not want this matter to be finally settled by Creighton Krueger, because that way, it means that he has failed extremely thoroughly in Syria.

Therefore, he still hopes to find a way to solve the Syrian problem himself.

In this way, it can also maintain its status as the king of war.

When the adjutant heard this, he couldn't help but say with some worry, "Commander, does this matter

need to be solved by the Lord himself?"

"In that case, it's really a little disadvantageous to us!"

Ulysses Eisenhower said boredly, "If we don't have a good way to solve Commander Hamid, then even if I don't want the Lord to come over, the Lord will not pay attention to me!"

As soon as he finished speaking, the commander of the government army hurriedly walked in and blurted out, "Ulysses, Commander Hamid dragged someone to bring me a message, he wants to negotiate a peace talk!"

Chapter 3207

"Peace talk?!"

Upon hearing Commander Hamid's initiative to negotiate a peace talk, Ulysses Eisenhower immediately said angrily, "This b\*stard killed more than 2,000 soldiers in the Dragon Hall of mine, and made us lose face in the field of international mercenaries."

"Now they want to talk for peace?!"

"I tell you, this is absolutely impossible! Our Dragon Hall will not agree!"

The commander of the government army asked in turn, "You don't want to negotiate or attack?"

"Are you going to continue to consume it like this?"

Ulysses Eisenhower said coldly, "Didn't we reach a consensus on this matter a few days ago?"

“At that time, everyone's opinions were very unified, that is, to wipe out Commander Hamid's armed forces.”

“Have you changed your mind now?”

The other party said, “The situation on the battlefield is constantly changing.”

“ At first, we said that the reason why we did not want to negotiate is because we felt that Commander Hamid might resist to the end, and it is impossible for him to agree to negotiate with us, but now he is.”

“Did you show your intention in this regard?”

“Then why don't we take this opportunity to have a good talk with him?”

Ulysses Eisenhower sternly said:, “We have nothing to talk about in the Dragon Hall.”

“Even if you want to negotiate with him, we will not change our original intention.”

“We must smash Commander Hamid and all his men into pieces!”

The other party frowned and said, "If your willingness to kill Commander Hamid is so strong, I suggest you fight him quickly.”

“Don't spend your time here waiting. Even if you can wait, I can't stand it!”

With that, he said impatiently, "How about it, let's withdraw our troops first, and your Dragon Hall will

continue to surround Commander Hamid here."

Ulysses Eisenhower frowned and cursed, "Are you f\*cking teasing me?"

"We are here to help you fight, and you have to withdraw your troops?"

"What else?" The other party asked him, "Do you want me to spend a year here with you?"

"Do you think we only have Commander Hamid as an opponent?"

"We still have many enemies like Commander Hamid waiting for us to be eliminated."

"We have no energy to die with a Commander Hamid here."

With these words, the other party said firmly, "Our military senior officials have given clear instructions."

"If there is no clear solution to this matter within five days, we will withdraw all our troops and rest, and then redefine the battle plan, whether you participate or not!"

Ulysses Eisenhower saw that the other party was not kidding himself at all and he was a little nervous.

He was not afraid that the government army would withdraw at this time.

He was mainly afraid that the government army would think that the strength of Dragon Hall was not good, and he will left Dragon Hall to work alone.

In that case, these efforts and sacrifices in the early stage of Dragon Hall will be in vain.

As long as the government army turns against each other and the two sides stop cooperating, the 100 square kilometers of land agreement will definitely be junked!

Thinking of this, Ulysses Eisenhower quickly advised, "Don't be in a hurry to withdraw your troops now."

"The reason why Commander Hamid volunteered to ask for peace talks at this time must be that he can't stand it, so he wants to find a way for himself through peace talks before the whole line collapses."

"If we persist again, maybe the other party will collapse by itself!"

Chapter 3208

The head of the government army said, "According to the information we have received, Commander Hamid should have a large reserve of materials."

"I dare not say more, but it is definitely no problem to hold on for a few months!"

Ulysses Eisenhower said quickly, "That's all rumors from the outside world."

"None of us knows how much Commander Hamid has."

"What if Commander Hamid deliberately set off smoke bombs to confuse us?"

"Let us mistakenly think that he is full of supplies, and then talk to him, and then we will be fooled by him!"

With that, Ulysses Eisenhower added, "And don't forget that he integrated many skirmishers and bravery some time ago."

"Now his number of people has doubled several times, and the consumption of food will be faster and faster!"

"Now, he can't hold on for a month, and all we need to do is be more patient and at the same time, we should be more resolute at Commander Hamid."

"If we don't leave Commander Hamid any opportunities, Commander Hamid will be in chaos!"

The other party shook his head and said, "My superior has agreed to the peace talks."

"As far as my superiors want, as long as Commander Hamid is willing to surrender publicly, disarm all his soldiers and disband them in place, we can no longer hold Commander Hamid any legal responsibility, and if Commander Hamid is willing, we are going to integrate him into the government army and let him hold a single officer and a half position."

"What?" Ulysses Eisenhower blurted out, "Commander Hamid killed so many of you, and he should be publicly sentenced to denounced, but you still want to put him in position?"

The other party said carelessly, "As long as he is willing to surrender, those are not problems."

"You know, Commander Hamid has become a beacon for all opposition now and a benchmark for all opposition parties."

"If Commander Hamid surrenders, the confidence of all opposition will suffer a serious setback, which is a great good thing for us."

“We would like to suppress him!”

Ulysses Eisenhower gritted his teeth and said, "Commander Hamid is our sworn enemy of the Dragon Hall!"

“If you want to reassure him, you should consider how our Dragon Hall will deal with this matter in the future!”

“Do you want to be the enemy of the whole Dragon Hall?!”

When the other party heard this, he was obviously worried.

Indeed, no one dares to provoke the powerful Dragon Hall casually.

Ulysses Eisenhower saw that the other party hesitated a little, so he took advantage and said, "Leaving aside your superior's attitude, you and I should have the same attitude towards Commander Hamid."

“We all hope to kill him quickly. So don't be so hurry to agree to Commander Hamid.”

“In my opinion, you might as well refuse him decisively first, so that you can also give him more psychological pressure! If you can refuse him, you won't lose much.”

“He can't be ashamed and angry because you refuse to talk to him, and then send troops to attack us.”

The other party thought for a moment and said, "Truth to you, Commander Ulysses. Even if I don't want to make peace with Commander Hamid myself, I'm afraid I can't do enough of this matter."

Ulysses Eisenhower immediately said, "It's useless for you. Don't forget that you can have the final say whether to negotiate peace or not."

"Even if you promise to negotiate with him and reach a reconciliation with him, our Dragon Hall will not agree!"

"At that time, fifteen thousand soldiers in our Dragon Hall will stay here."

"As long as Commander Hamid and his men dare to come out, we will fight to the death!"

The other party suddenly became embarrassed.

If Ulysses Eisenhower really doesn't want to talk about peace, it doesn't make any sense for them to talk to Commander Hamid alone.

After all, who can do to them if the Dragon Hall does not withdraw its troops?

Thinking of this, he said helplessly, "Commander Ulysses, I will give you five more days to consider."

"If you still don't want to talk to Commander Hamid in five days, then we can only withdraw our troops!"

"Okay!" Ulysses Eisenhower thought that it was five days to drag on, so he agreed without hesitation and blurted out, "Then you can talk to Commander Hamid first and say that you don't consider peace talks for the time being!"

"Okay!"

Subsequently, the news quickly went back to Commander Hamid through the middleman.

When Commander Hamid heard that the government army was unwilling to negotiate with him for the time being, he immediately cursed angrily, "D\*mn, I volunteered to negotiate, but they are not willing!"

"It's really a shame!"

After saying that, he quickly asked Charlie, "Brother Wade, what should we do now?"

"Wait for them to change their minds?"

Charlie frowned and shook his head and said, "I'm anxious to go back and have something to do. I can't wait."

After saying that, Charlie said, "They don't want to talk about peace."

"They think they don't know enough about your strength."

"Yes!" Commander Hamid said coldly, "They must think I am a soft persimmon!"

Charlie snorted and said, "In this way, you immediately take all your stockpiled materials, send them the photos, and then tell them that this is just the tip of the iceberg of all your strategic reserves, and finally give them a chance to negotiate."

"I don't believe they won't agree this time!"The Amazing Son-In-Law

Chapter 3209-3210

## Chapter 3209

In this world, the last person who wants to negotiate with Commander Hamid is the Dragon Hall.

The Dragon Hall suffered heavy losses on Commander Hamid this time, and the entire mercenary world is watching their jokes.

If Dragon Hall talks to Commander Hamid at this time, wouldn't it be embarrassing?

However, Ulysses Eisenhower is also very clear in his heart that the real key of this matter is the government army.

If the government army are willing to negotiate, and the Dragon Hall's side does not, it will instead cause contradictions between the Dragon Hall and the government army.

According to Dragon Hall, not to mention killing Commander Hamid, it is likely that they will turn against government army, and even the land they promised before will be canceled.

If that's the case, Dragon Hall is too passive, and the most f\*cking thing is that they can't get revenge from the government army.

Because mercenaries only exist in the gray area, if they dare to confront the government forces of any country directly, it will inevitably cause international public indignation.

Therefore, in this case, Ulysses Eisenhower can only find a way to stabilize the government army, otherwise once the government army decides to negotiate peace, he will be unable to redeem his face.

But just as the government commander promised Ulysses Eisenhower to wait for a few more days, the middleman sent him several photos.

In several photos, Commander Hamid stood in different mountain tunnels, and all kinds of materials behind him piled up like mountains.

The middleman also sent a voice for Commander Hamid, which was recorded by Commander Hamid himself, "You must think that I am very short of supplies now."

"Now I will show you my strategic reserve."

"Believe it or not, I will remind you that this is only part of my strategic reserve! Don't want to talk about peace? Think about it!"

When the government commander saw these photos, he immediately felt that his blood pressure had doubled!

It is no exaggeration to say that Commander Hamid has shown more strategic reserves than the strategic reserves of the whole government army!

The government army is now poor, and all kinds of materials are scarce, but Commander Hamid is different.

Commander Hamid's supplies are piled up like mountains, and there are countless food, drinks to use!

Moreover, Commander Hamid deliberately showed the captured weapons and equipment.

The 2,000 sets of advanced American standard equipment in the Dragon Hall alone were enough to make his scalp tingle.

In this moment, he understood one thing.

This battle can't be fought at all!

So, he came to Ulysses Eisenhower's office again with a black face.

After entering the door, his first sentence was, "Commander Ulysses, I have decided."

"I will have a peace talks with Commander Hamid this afternoon."

"If Dragon Hall do not participate, then I will talk to them myself."

"After the discussion, we will withdraw our troops!"

Ulysses Eisenhower suddenly had a big head and blurted out, "Have we agreed to wait a few more days?"

"Why don't you have any credibility?"

"Credibility?" The other party threw the mobile phone in front of him angrily and said coldly, "You say that Commander Hamid can't hold on for too long."

"Look at it yourself. Does it look like he can't hold on for too long?"

Ulysses Eisenhower frowned and picked up the other party's mobile phone and looked at it a few times.

His whole expression suddenly became extremely ugly!

He didn't expect Commander Hamid to have such a huge strategic reserve.

Judging from his reserves alone, it is not a problem to stick to it for a year.

So he asked, "Where did these photos come from?"

The other party said coldly, "This is all from Commander Hamid himself!"

Chapter 3210

Ulysses Eisenhower's expression was gloomy and said, "Commander Hamid is convoking our army!"

With these words, he opened his mouth and said, "Well, it is no longer up to me to negotiate peace."

"I will immediately report to our Lord, and it's up to him to decide everything!"

The other party disdainfully said, "I don't care about you."

"I just came to tell you that I have made an agreement with the other party that Commander Hamid's negotiators will arrive at the military camp by helicopter at three o'clock this afternoon, and then I will have peace talks with him face to face, whether you participate or not!"

With that, he took back his mobile phone from Ulysses Eisenhower's hand and turned away.

Ulysses Eisenhower wiped a cold sweat on his forehead, and immediately took out his satellite phone and dialed it to Creighton Krueger far away in Eastcliff.

At this time, the ten thousand troops were in the old courtyard looking at dozens of cheap coffins piled up in the yard with great satisfaction.

These coffins are made of thin and rotten wooden boards.

Although the whole body is painted with extremely inferior red paint, you can also see the cracks on the coffin board that are enough to be stuffed into the dollar coin.

Moreover, this inferior paint tastes very pungent, and even in the open air, it makes people feel more or less uncomfortable in the eyes and throat.

Looking at so many cheap coffins, Creighton Krueger smiled very satisfied and asked Apollo Wainwright, "Apollo, where did you buy this pile of rotten wood?"

"I've lived for more than 20 years and haven't seen such a bad coffin..."

Apollo Wainwright laughed and said, "These coffins are really hard to find. I took people to the poorest mountainous area, and then asked the old carpenter there to make them overnight..."

With that, he knocked on the coffin board of one of the coffins and laughed, "People say that the thicker the coffin board, the better, but the thickness of this coffin board is not as thick as the bed board used in the countryside."

"The old carpenter told me that although they are poor mountainous areas, no one in the mountain is willing to use such a bad coffin."

"They would rather go up the mountain to cut down trees by themselves."

"It is said that this kind of junk is specially prepared for those old poor families with no children."

“Good, good.” Creighton Krueger nodded with satisfaction and said, “On the day before the ancestral ceremony, you should take enough people to send these coffins to the Wade family!”

“If the Wade family is willing to take the initiative to give up Wade Mountain, take the initiative to dig out the coffins of Bruce Wade and all the ancestors of the Wade family, make room for my parents, and the whole family will welcome my parents’ coffins to Wade Mountain in hemp, I can spare them a dog’s life, but if they don’t want to, these coffins, think of it as a meeting gift I prepared for them!”

Apollo Wainwright was secretly surprised and couldn’t help asking, “My Lord, let the Wade family take the initiative to dig out the coffin of their ancestors and then put on filial piety for your parents.”

“Can the Wade family accept this kind of shame?”

Creighton Krueger said blankly, “If they accept, I will save them a dog’s life; if they don’t accept, these coffins will be prepared for them!”

Apollo Wainwright asked him, “Master, if the Wade family agrees to your terms, what will you do with Bruce Wade?”

“After all, he has been dead for so many years.”

Creighton Krueger said coldly, “I have already planned the fate of Bruce Wade.”

“After my parents are moved to Wade Mountain, I will personally throw Bruce Wade down in front of my parent’s grave!”

“Let my parents in the spirit of the sky, I can see that I finally embraced the blood of the past for them!”

At this moment, the order-men of Creighton Krueger took a satellite phone and ran over quickly, blurting out, "My Lord! A call from the Green-Eyed Wolf King!"

"He want to report something important to you!"

Creighton Krueger frowned and said sternly, "Then he had better have some good news to tell me!" The Amazing Son-In-Law

Chapter 3211-3212

Chapter 3211

As soon as the phone was connected, Creighton Krueger asked Ulysses Eisenhower straightforwardly, "Is there any good news for me?"

Ulysses Eisenhower said very nervously, "My Lord...today, Commander Hamid found an intermediary to express his desire for peace talks..."

"Peace talks?" Creighton Krueger immediately said angrily, "He and his soldiers are responsible for the death of more than 2,500 Dragon Hall soldiers."

"I will not accept any results except to destroy them!"

Ulysses Eisenhower summoned up courage and said, "My lord, the problem now is that we can't nibble at Commander Hamid at all."

"It's a problem to go on like this! Our economic losses every day are very serious, and it's really out of the gains and losses..."

Creighton Krueger said harshly, "As long as you surround them completely and don't leave any chance to escape, it won't take long for them to be in chaos."

“Even if they don’t mess up, they won’t last long!”

“How can a group of native hats in the mountainous areas of the Middle East fight a protracted war with us at this time?”

Ulysses Eisenhower sighed, “My lord...the key problem is that Commander Hamid has already stored a large amount of strategic materials.”

“I dare not say anything else. With their current material volume, 10,000 people will certainly be no problem, but we can’t accompany him here for a whole year, and now the government army is giving up...”

With these words, Ulysses Eisenhower reported his current situation in detail with Creighton Krueger.

When Creighton Krueger heard these situations, he was angry.

He almost scolded in a hurry, “Ulysses! I have not suffered such a big loss since the establishment of Dragon Hall! I have not lost with such a person, and have not fallen into such a passive situation!”

“You have really broken several records in a row!”

Ulysses Eisenhower was also full of grievance at this time and said in pain, “My Lord, I admit that I did underestimated the enemy before.”

“I didn’t expect to meet a decent opponent in Syria.”

“I am willing to accept your punishment at any time.”

“But the key problem now is that Commander Hamid surrounded himself in an iron bucket and prepared a lot of food.”

“We are in a dilemma of 15,000 people!”

“If the government army withdraws and only our people still surround Commander Hamid here, the situation will be even more embarrassing.”

“The government army will only pay for the mercenaries who work for them.”

“We not only lose the battle, but also against their will. They are likely to fall against us, and the gains will outweigh the losses... ..”

Creighton Krueger can't wait to go to Syria personally to shred Commander Hamid, because he knew that as long as Commander Hamid will die, his arms would be completely dismantled, and all problems would be solved.

## Chapter 3212

However, he looked at the mountain of cheap coffins in front of him and couldn't help telling himself not to be distracted at this critical moment.

Creighton Krueger secretly said in his heart, “Although I am very sure that I can kill Commander Hamid unconsciously, it is not a few days before the festival, and time is really too tight!”

“Even if I'm going to Syria from China now, it will take at least more than 30 hours to spend time on the road again and again!”

“In case I am delayed due to some factors that I can't foresee, I won't be able to go to Wade Mountain

in person on the festival!”

Thinking of this, Creighton Krueger gritted his teeth and said, “Well, don’t make too stiff with the government army for the time being.”

“Since they want to make peace talks with Commander Hamid, you can also participate in the specific details of the peace talks together.”

“It’s better to delay the pace and progress of their peace talks.”

“But if the government army really has made an idea, you have to stand up.”

“Make sure you will never compromise, let our soldiers continue to stay there, and wait until I finish the important things here before we can solve it!”

Ulysses Eisenhower can only agree and say, “Then I’ll meet Commander Hamid’s people first this afternoon to see what their attitude is.”

“Okay.” Creighton Krueger exhorted, “In any case, we must hold Commander Hamid and the government army, and never let them reach any agreement in private.”

“If the government army can’t wait to withdraw, you tell them that my army’s reputation guarantee that no matter how much strategic Commander Hamid has, I will be before the end of April.”

“With my strength, I believe they still hear about it!”

.....

After Ulysses Eisenhower agreed to the peace talks, the middleman quickly fed back the news to Commander Hamid.

The peace talks are scheduled for 3:00 p.m. this afternoon.

As for the venue of the peace talks, it is the garrison of Ulysses Eisenhower and the government commander.

However, instead of informing Commander Hamid of the specific location coordinates of the garrison, Commander Hamid was given a coordinate of the transit site, and Commander Hamid's pilots would first send the negotiators to the transit place, and then their helicopters would take the negotiators to the negotiating site.

Charlie is very clear about the other party's motivation to do so.

They mustn't leaked the location information of the leadership, afraid that Commander Hamid would have a round of intensive artillery fire directly at that coordinate, so he did not object to it.

Commander Hamid also made three demands with the other party:

First, at the negotiating table, in addition to their own negotiators, the Dragon Hall and the government army must send their supreme commanders, otherwise they will not talk;

Second, his negotiators take off from his base by helicopter, at which time the helicopter will dismantle all weapons, equipment and ammunition, and the other party must explicitly promise all soldiers not to open fire on the helicopter;

Third, no matter what the two sides talk about, they must not hurt their negotiators.

His three requests were reasonable, so he quickly got a definite answer from the other party.

At 2:30, Charlie put on a camouflage suit and put on a disposable mask, ready to take Commander Hamid's helicopter to the transit place agreed with the other party.

Commander Hamid was very worried about Charlie's safety, afraid that Charlie would encounter accidents after going deep into the tiger's den.

However, Charlie has made up his mind.

Commander Hamid knew that he could not persuade him, so he had to send him to the helicopter himself and said sincerely, "Brother, take care. I'll wait for you here!"

Charlie nodded and said indifferently, "After I left, tied Zayne up and took him directly to the plane to leave when I came back."

Commander Hamid said quickly, "Good brother, don't worry, I'll go!"

With these words, Commander Hamid asked him again, "Brother, that Green-eyed Wolf King, what are you going to do after you control him?"

Charlie said without hesitation, "I will take him away when the time comes, but it may leave you a little trouble."

"Dragon Hall will definitely put this bill on your head."

Commander Hamid said indifferently, "I have already carried two thousand and five hundred lives in the Dragon Hall."

The Amazing Son-In-Law

Chapter 3213-3216

Chapter 3213

Charlie took a helicopter and arrived at a wasteland about 50 Kilometers away from Commander Hamid's base.

At this time, two government helicopters were parked here, as well as a dozen armed personnel composed of government troops and Dragon Hall soldiers.

Under the guidance of the opponent's soldiers, the helicopter Charlie was riding in slowly landed on a clearing in front of the opponent's two helicopters.

As the helicopter stopped, Charlie, who was wearing a mask, opened the door and jumped off.

At this time, a Syrian soldier on the other side came forward and said a lot of language that Charlie could not understand.

Charlie waved his hand and said, "Please communicate in Chinese or English!"

An officer of a government army came forward and said in less proficient Chinese, "My Chinese... is worse..."

At this time, a Chinese man among several soldiers in Dragon Hall stepped forward with surprise and asked Charlie in Chinese, "Are you Chinese?"

This person is Ulysses Eisenhower's personal bodyguard, named Carrigan Astley.

Carrigan Astley is two years younger than Ulysses Eisenhower. Both of them are Chinese immigrants to Africa.

Both parents were still entrepreneurial partners in those years.

However, in the early years, a riot in Africa made the enterprises that their parents worked hard to create were robbed by thugs.

Both parents died at the hands of thugs in order to protect their lifelong efforts.

Before their death, their parents pushed them into the river.

They were washed nearly 100 kilometers downstream with a piece of driftwood in their arms, which was considered to survive.

The two surviving people depended on each other.

They had been beggars, stole things, and even worked for the black boss together.

Later, in order to survive, they went to Colombia to join the guerrillas.

At that time, Colombia was in turmoil.

Although all kinds of guerrillas claimed to fight against social injustice, many of them were actually bandit organizations that occupied the mountain as king.

The young two of them spent many years in the guerrillas, which was also considered to have developed

an extraordinary actual combat experience.

Later, when they met Creighton Krueger, they joined Dragon Hall together.

However, Carrigan Astley's strength is much inferior to Ulysses Eisenhower's.

With Ulysses Eisenhower's progress in Dragon Hall, Carrigan Astley seems to be a little unable to keep up.

However, because of Ulysses Eisenhower's brotherhood with him, he was taken with him and tried his best to win the title of a three-star warrior.

It can be said that Carrigan Astley is the worst three-star warrior in the Dragon Hall.

However, since he is Ulysses Eisenhower's personal bodyguard and does not directly lead soldiers to fight, everyone has not been too pursued.

At this time, Charlie looked at Carrigan Astley, who was similar to his age and was also an East Asian face, and asked faintly, "Are you also Chinese?"

"Non-Chinese." Carrigan Astley replied and asked Charlie in some surprise: "Why haven't I heard of Commander Hamid's armed forces with Chinese?"

In the knowledge of all the people in the Dragon Hall, Commander Hamid is a local rebel army, and they have faith in themselves, so his team must be all Syrians.

However, Carrigan Astley did not expect that Commander Hamid actually sent a Chinese as a representative to conduct peace talks.

Charlie looked surprised at the other party and said indifferently, "You can all have members from all over the world in the Dragon Hall."

"Why can't you have me as a Chinese in the armed forces of Commander Hamid?"

Carrigan Astley was stunned for a moment.

Unexpectedly, the guy in front of him dared to compare with the members of Dragon Hall.

He couldn't help but be a little angry.

Then he said arrogantly, "Our Dragon Hall is a mercenary organization that gathers the world's top mercenaries."

"Even many of us are kings who have served in our own special forces."

"More than half of the soldiers on Commander Hamid's side don't even know anything."

"Can it be the same thing?"

"Between the two of us, the gap is much bigger than that between the United States and Zimbabwe!"

Charlie snorted and said calmly, "So it is."

Speaking of this, he asked Carrigan Astley curiously, "By the way, I have a question that I don't understand. Can you ask them for me?"

Carrigan Astley hmm, "Speak!"

#### Chapter 3214

Charlie smiled and said, "If your Dragon Hall is so strong, why are you defeated by a group of illiterate people one after another, and have suffered heavy losses?"

"If I remember correctly, you should have lost more than 2,500 people, and there is another five-star general, right?"

"You..." Carrigan Astley was immediately angry when he heard this, and scolded sharply, "You have only won twice by insidious means."

"Sooner or later, our pantheon will calculate this account with you!"

Charlie laughed and said, "Then we are so welcome."

"You don't know. Now our soldiers complain about their hands every day."

"They all want to kill a few soldiers in Dragon Hall for fun."

"But you are too timid, we are waiting for so many days for you to launch a charge again. To be honest, your Dragon Hall is really disappointing."

Carrigan Astley scolded red-eared to the east, "Damn it! Pay attention to me when you talk!"

Charlie frowned and said disdainfully, "What's your attention? What are you?! I came here today to

negotiate with you, not to come to see you pretend!”

With that, Charlie continued with an unhappy face, “Why don’t you get out of here?”

“There is no need to talk between us and you in the Dragon Hall.”

“We can continue to fight or remain deadlock in the future.”

“No matter how you decide, we will accompany you to the end. From now on, I will only talk to the representatives of the government army!”

Carrigan Astley didn’t expect Charlie to turn against him, and his attitude was still so tough.

For a while, he was angry and anxious.

He knew that Ulysses Eisenhower, his leader, even the Lord himself, did not want to negotiate peace with Commander Hamid.

But the current situation is that Dragon Hall can’t tear its face to the government army because of peace talks.

Otherwise, once the government army turns against them, the preparation of Dragon Hall for a base in Syria will be ruined.

Therefore, even if they disagree for peace talks in the bottom of their heart, Dragon Hall must pretend and then find a way to delay until after April 5.

If Commander Hamid is not directly willing to continue to talk with Dragon Hall, but rather peace with the government army because of his own remarks, the situation is too passive.

Therefore, he could only bravely say with apologetic face, "Brother, we are all Chinese compatriots and risk our lives overseas to make a living."

"There is no need to make such an unpleasant thing, right?"

Charlie said coldly, "We're Chinese, but I just despise your garbage compatriots!"

"Going out and sneering and saying bad words to your compatriots, you first rely on finding a sense of existence for your compatriots."

"I see you are the kind of garbage that cheats your compatriots as soon as you come out!"

Carrigan Astley is also a three-star warrior in Dragon Hall.

When was he scolded so much?

However, he really dares not stare at Charlie now.

After all, if he really delays the peace talks for his own reasons, he can't bear this mistake.

So he had to smile and said, "Yes, yes, yes, I really shouldn't."

"I apologize to you! The main reason is that our Dragon Hall has indeed suffered heavy losses, so I am a little angry, and I hope you can forgive me..."

Charlie glanced at him disdainfully, and said coldly, "Remember, when you go out in the future, be a low-key and kind person, and don't shame the Chinese compatriots!"

"You are right..." Carrigan Astley nodded and said with a bow, "Don't worry, I will be a low-key person and do things kindly in the future..."

After finishing speaking, he resisted the humiliation and said to Charlie imploringly, "Brother, what happened just now was my fault."

"I have realized my mistake, so please don't be familiar with me."

"Now, our commander and the government army commander are waiting, how about we should hurry up, what do you think?"

## Chapter 3215

In fact, the real purpose of Charlie's trip was not to meet the head of the government army at all.

What he really wanted to meet was the supreme commander of the Dragon Hall in Syria, Ulysses Eisenhower, who was known as the Green-eyed Wolf King.

Wanting to be surrounded by more than 30,000 people and bring Zayne back to China, Charlie's only choice was to capture the Commanders first.

Moreover, it happened to be able to take this opportunity to touch the actual combat effectiveness of the Dragon Hall and see what level their four Great War Kings can achieve.

As for Carrigan Astley, Charlie also saw that he was a martial artist, opening up two meridians, which was almost the standard of a two-star martial artist.

Therefore, he inferred from this that most of the middle and high-level officials of Dragon Hall should be martial artists.

And he scared Carrigan Astley completely because he was unhappy with this guy.

And he was also very clear that Dragon Hall must be most afraid of Commander Hamid's private peace with the government army, so Charlie was sure that he could hold him.

Sure enough, Carrigan Astley was afraid that Charlie would really turn against him at this time, so he almost kneel on the ground and beg him.

Charlie saw Carrigan Astley's humble face, and his mood was a little better.

He said lightly, "Since you can correct your mistake, then I'll give you a chance. Let's go!"

Carrigan Astley was relieved and said quickly, "Thank you brother, thank you brother!"

With that, he added, "By the way, brother, before we set out, we have to carry out a routine body search for you."

"I hope you understand."

Charlie stared at him and asked coldly, "What's the matter? Why won't you ask me in a humble way?"

Carrigan Astley quickly apologized, "Oh, I'm really sorry, I'm careless."

“Please forgive me!”

Charlie said coldly, "Speak again!"

Carrigan Astley was eager to tear Charlie directly, but he could only bravely put his head forward and said respectfully, "According to the usual practice, we have to carry out a routine body search for you.”

“I hope you can be more considerate and don't mind!"

Charlie asked, "What? I went deep into the tiger's den alone.”

“Are you still afraid that I will have any threat?"

Carrigan Astley said honestly, "After all, you are going to see our supreme commander in Syria, so we must make sure that there is no mistake.”

“Please forgive me!"

Charlie snorted disdainfully, then raised his arms and said lightly, "Okay, search!"

Carrigan Astley immediately wink at the two soldiers beside him.

The two men even took out a metal detector and kept sweeping Charlie's body around.

They wanted to make sure that Charlie did not have guns, daggers, explosives, and even made sure that he did not have GPS trackers on him.

Charlie knew that the other party would definitely search for himself, so he didn't even bring his mobile phone with him, so the other party searched carefully several times and found that there was nothing abnormal, so he was relieved.

Immediately, Carrigan Astley said to Charlie, "By the way, can you take off your mask?"

Charlie refused ruthlessly, "No!"

Carrigan Astley said awkwardly, "You can't wear a mask to negotiate with our commander, can you?"

Charlie asked back, "What? I can't? Then let's forget about this peace talk."

Carrigan Astley took the clothes and hurriedly said, "It's okay, you can wear it if you want..."

The reason why Charlie chose to wear a mask is that he has not figured out the situation of Dragon Hall.

At this time, if he suddenly reveals his true face and is captured by the other party's monitoring or recorder cameras, I'm afraid that the other party can easily find his real identity.

After all, face recognition technology is extremely developed now, and he should be cautious at this time.

After all, Charlie is also unable to fight against a mercenary organization of tens of thousands of people on his own.

Carrigan Astley saw that he could not hold Charlie, but was held by Charlie dead, so he no longer insisted, just wanted to take him over and hand in the job quickly.

So he took Charlie and took him to the other party's front headquarters on the helicopter that had been ready for a long time.

#### Chapter 3216

After flying for about ten minutes, the helicopter slowly landed in front of a movable board room.

These activities board houses are all the residences of middle and high-level officers of the government army and Dragon Hall.

Compared with tents, the conditions are indeed much better.

Moreover, camouflage canopy is set up on both tents and movable board rooms.

From the sky, it is a dense camouflage, and it is difficult to distinguish where the officer's station is.

After getting off the helicopter, Carrigan Astley took Charlie all the way to the front-line conference room of Dragon Hall.

As they walked, he asked Charlie, "Brother, I don't know where in China you came from?"

Charlie said lightly, "You should asked the things what should be asked, and don't ask nonsense."

Carrigan Astley's teeth were about to be bitten, but he could only say awkwardly, "No... I have to introduce you to our commander later."

" Do you have to say a name?"

Charlie casually said, "My surname is Wade, you just need to call me Master Wade."

"Master Wade?" Carrigan Astley looked at Charlie in a daze.

Although he could not see his face, at least he could see from his eyes that he was not joking.

Carrigan Astley was very embarrassed and secretly said, "What kind of shit this f\*cking jerk?"

"His ability to pretend is really unprecedented."

"Master Wade, what kind of teacher is he? What master?"

Although he was unhappy, Carrigan Astley said with great respect, "It turned out to be Master Wade. It's a pleasure to meet you. I'm Carrigan Astley, a three-star warrior of Dragon Hall!"

"Samsung fighter?" Charlie asked curiously, "South Korea sponsored?"

Carrigan Astley asked with a demented face, "Wade ... Oh no, Master Wade, what do you mean... I don't understand..."

Charlie casually said, "Don't you say you are a Samsung warrior? I ask you, is your name sponsored by Samsung Group of South Korea?"

Carrigan Astley wanted to die and blurted out and explained, "Master Wade, you are so good at joking."

"The three-star warlord is the star of our Dragon Hall warlord."

“The lowest is one star and the highest is five stars.”

“I am a three-star, so it is a three-star fighter.”

Charlie couldn't help frowning and secretly gnarling, "This Carrigan Astley is a two-star warrior.”

“If the two-star warrior can only rank as a three-star general in the Dragon Hall, will the four-star warrior at least reach the strength of a three-star warrior?”

“Or will the five-star general reach the strength of the four-star warrior?”

“Then their lords, at least, must have the strength of five-star warriors or even higher?”

"If this is really the case, the strength of Dragon Hall is really terrible.”

“There are so many martial arts families in China.”

“At present, only Mr. Elms of the Elms family has successfully broken through to the four-star martial arts with my help, but there must be at least many four-star and more martial arts in the Dragon Hall.”

Thinking of this, Charlie asked, "I heard that during the war the other day, our soldiers killed one of your five-star general?”

“That man should be much stronger than you, right?”

Carrigan Astley gritted his teeth and said, "What you said is our five-star general Philipp Grant.”

"His strength is far above me. He is one of the strongest of our more than 100 generals..."

Charlie shook his head and said, "It seems that no matter how strong he is, he's nothing in front of bullets."

"After practicing hard for half a lifetime, he was shot dead by an illiterate person in Syria. Do you think it's a loss?"

Carrigan Astley's heart became even more angry when he heard this.

He had a good personal relationship with Philipp Grant, and now he was very angry when he heard that the other side was so sarcasm about Philipp Grant.

However, what Charlie said made him unable to refute.

Moreover, the sarcasm of Commander Hamid's tribe was illiterate, which he himself said just now.

Philipp Grant's strength is very strong.

If a few soldiers shoot at him with machine guns, he really has a great chance to escape and kill the opponent.

However, in the last battle of the Philipp Grant, he and many Dragon Hall elites were surrounded by multiple gun bullets in all directions formed an all-round firepower net.

The heavy machine gun with caliber of 12.7 mm even weighs ten tons.

African elephants can also be killed in one blow.

Therefore, even if Philipp Grant is a five-star warrior, he is simply unable to recover.

Carrigan Astley's inner hatred for Charlie was already overwhelming, almost resisting the urge to draw a gun, and biting his teeth.

He brought Charlie to the door of the meeting room.

Then he knocked on the door, and someone inside said, "Come in."

Carrigan Astley pushed the door in, and a Chinese man sitting on the opposite side said, "Commander, the negotiator of Commander Hamid, Master Wade, is here!"

"It doesn't matter if I have one more!"The Amazing Son-In-Law

Chapter 3217-3220

Chapter 3217

In the meeting room at this time, Ulysses Eisenhower and the government army commander were sitting in jeopardy, and Ulysses Eisenhower was wondering how to subtly interfere with Commander Hamid's intention of peace talks with the government army for a while.

Suddenly hearing Carrigan Astley's words, the whole person was a little astonished, and subconsciously asked, "What did you say about the negotiator's name?"

Carrigan Astley said awkwardly, "Master Wade..."

After speaking, he hurried away and said to Charlie behind him, “Master Wade, please come in.”

Charlie nodded, put his hands behind him, and walked in leisurely.

As soon as he entered the door, he saw Ulysses Eisenhower sitting in front of the conference table.

At a glance, he found that Ulysses Eisenhower was indeed unusual.

Looking at him, he was only about 30 years old, and the strange meridians and eight veins on his body actually opened six times.

Charlie is also the first time he has met a martial artist who can open up six meridians.

Such strength can basically blow up all the Elms family members, including Master Elms, who can serve himself in Aurous Hill alone.

At the same time, Charlie couldn't help but feel happy for Commander Hamid.

If he hadn't helped Commander Hamid prepare, Ulysses Eisenhower alone would have easily sneaked into his base and twisted off his head.

No wonder after Dragon Hall began to cooperate with the government army, they were all the way.

With such masters sitting in power, the Syrian opposition was no match at all.

However, it is also because Commander Hamid has comprehensively upgraded his defense that Ulysses Eisenhower's possibility of beheading has been curbed.

Although Ulysses Eisenhower is a six-star warrior and far stronger than ordinary people, his body is far from reaching the state of copper walls and iron walls.

If he is really exposed to the firepower network of machine guns, he will also be beaten into a sieve.

Ulysses Eisenhower was very afraid of the tragic death of the Philipp Grant, so he did not behead Commander Hamid.

Ulysses Eisenhower looked quite surprised when he saw Charlie coming in.

He subconsciously asked, "You...are you Chinese?"

"Yes." Charlie went straight to his opposite side and sat down.

He said lightly, "I am Commander Hamid's military adviser and his only representative for this peace talk."

"Commander Hamid, the Plenipotentiary, negotiates with you."

Ulysses Eisenhower asked puzzledly, "How can you join Commander Hamid's team as a Chinese?"

Charlie laughed and said, "What's so strange about this?"

"Everyone is out to make a living."

"You can join the Dragon Hall, and I can also join Commander Hamid."

Ulysses Eisenhower frowned at Charlie and said, "Since you've come to negotiate, why are you still wearing a mask?"

"Don't you dare to show your true face?"

Charlie looked around and saw that there was no video equipment in the conference room.

He took off his mask and said lightly, "I am relatively low-key, and I don't like to expose my true face in front of many people."

Ulysses Eisenhower stared at Charlie's face and found that the young man seemed to be five years younger than himself.

He couldn't help asking, "I don't quite understand that although Commander Hamid's team is not very effective, they generally do not associate with different beliefs."

"You are young and a foreigner."

"What the hell is going on? Entering his team, and mixing in a military advisor?"

Charlie laughed and said, "Of course, I have mixed up with the military division by strength."

Ulysses Eisenhower laughed and said, "I think you are just a hairy boy like an unbound chicken."

"Even I don't think you look like a martial artist. What strength can you have?"

Charlie smiled and said, “Don’t you find that Commander Hamid’s defense now far exceeds that of other opposition forces?”

“Don’t you find that Commander Hamid’s overall skills and tactics are greatly improved compared with before?”

Ulysses Eisenhower frowned and asked, “Listen to what you mean, as if it’s all attributed to you?”

“Of course.” Charlie raised his eyebrows and laughed, “It’s no exaggeration to say that most of it is my credit.”

Ulysses Eisenhower snorted and asked in a bad tone, “So, do you seem to be awesome?”

Charlie nodded and said with his finger, “You see, the tactical planning of the forward inclined fortifications with the anti-slope defense tunnel, the guidance for abandoning all the bases in the valley and transferring them to the mountain tunnels, and the strategic core of building walls, storing grain and slowly becoming king, these are all my ideas.”

“There are the essences of these tactics.”

“The guidance, even if it’s just a bunch of mud legs, can play out the combat potential far beyond ordinary people’s imagination.”

“These are all tailor-made for Commander Hamid. Judging from the first two major victories, I’m really awesome.”

With that, Charlie gave a slight beating and laughed again, “At least, it’s a little more awesome than you.”

Ulysses Eisenhower thought of the tragic death of his brothers in Commander Hamid's position of more than 2,500 men, and immediately patted the table angrily, "Kid, don't be too arrogant!"

Charlie shook his head disdainfully and said, "It's really boring for you to have such a small heart."

"You questioned that I was not awesome enough, so I answered you and where I was awesome."

"As a result, you were still ashamed and angry."

"What's wrong? You don't understand the saying that victory or defeat is a common thing for soldiers? Or do you understand, but you can't afford to lose?"

Ulysses Eisenhower subconsciously blurted out and roared, "I can't afford to lose!"

Chapter 3218

Charlie smiled and asked, "Oh? You can't afford to lose?"

"Then you still want to pat the table and stare at me after you insult yourself?"

"Isn't it that you can't afford to lose? Is this the heart of a King of the Four Battles of the Dragon Hall?"

Ulysses Eisenhower didn't expect Charlie's words, and his words made him angry but did not know how to attack.

He also knows that losing on the battlefield is losing. No matter what disgusting tactics the other party uses, it is not a reason for his failure.

He can't ask Charlie why his people hide in the bunker and why his people set traps to kill so many of his brothers.

If he ask him such a question, he will really lose all his face, and the face of Dragon Hall.

So he could only grit his teeth and point to Charlie and say, "You! I will remember you!"

Charlie nodded, "You'd better remember it clearly."

At this time, the government commander who had not spoken all the time said, "Okay, we are here to talk about peace today, not to quarrel, let's seize the time to get to the point!"

Charlie laughed and said, "Well, let me talk about the core demands of our commander in this peace talks."

The government commander hurriedly said, "Okay, you say!"

Charlie said seriously, "First of all, we are willing to negotiate a ceasefire with you."

"As long as you give up encirclement of us, we will also keep a distance from you and not infringe on each other."

When Ulysses Eisenhower heard this, he immediately said angrily, "What a joke! Just one sentence of you wants us to give up the siege?"

"Why? If we give up the siege, are you willing to disarm and surrender?"

Charlie laughed and said, "We are all adults. Don't talk so naively."

"It is never possible to surrender, and it is impossible to surrender in this life."

Seeing Charlie mocking his innocence, Ulysses Eisenhower said angrily, "What? I'm naïve to let you surrender? Isn't it naïve if you let us give up the encirclement?"

Charlie gave him a white look and said, "I have just said that first of all, you are also Chinese, you should know what these two words mean first, it is just a prerequisite, do you understand the prerequisite?"

Ulysses Eisenhower couldn't hold back his anger, and sternly shouted, "Are you f\*cking here to negotiate or to provoke!?"

Chapter 3219

Seeing Ulysses Eisenhower's anger, Charlie laughed instead, and said with emotion, "Oh, I suddenly remembered that someone asked me a similar question more than a year ago."

"She asked me whether I was there to celebrate her birthday or come to borrow money, the way you just said this is indeed a bit like her."

Ulysses Eisenhower scolded coldly, "If you borrow money at someone's birthday banquet, then you are really f\*cking enough!"

Charlie sighed, "Yeah, it's quite f\*cking. It's not a last resort."

"Who would want to borrow money on that occasion?"

"It's just that there was a life-saver who was seriously ill and needed money urgently."

“I just give it a try, even if it was embarrassing.”

Ulysses Eisenhower’s expression softened a little and said coldly, “Okay, no one wants to listen to your story.”

“Let’s get straight to the point!”

Charlie smiled and said, “Okay, get straight to the point.”

“As I just said, the ceasefire between the two sides and the withdrawal of your troops are prerequisites.”

“On the basis of your meeting our precondition, our second condition is that the Dragon Hall must all get out of Syria!”

“Damn!” Ulysses Eisenhower’s whole body was immediately furious.

He stood up, his fingers almost reached the tip of Charlie’s nose, gritted his teeth and cursed, “Are you f\*ck!ng fooling me?!”

“Not only let us withdraw our troops, but also let us get out of Syria.”

“Who the f\*ck gave you the courage to dare to talk to me like this?!”

“You just don’t care about the Dragon Hall!”

Charlie said coldly, "I didn't pay attention to your Dragon Hall in the first place!"

"Get out of Syria. I don't want to kill too many of you and leave you a meal!"

"You are so old that you can't even figure it out?"

With that, Charlie's expression became colder and said word by word, "Look at your Dragon Hall. More than 2,000 people was killed in a day."

"How are you going to fight this battle?"

"It's a huge expense for you to stay here for 15,000 people to eat horses every day."

"How long can you last?"

"And our supplies are enough for 10,000 people to easily support for a year!"

"It's not a problem to tighten your belt for a year and a half!"

"Our weapons and ammunition are enough to kill you ten times, and then thanks to your convoy of 2,500 people, the weapons and ammunition are enough to kill you even 20 times!"

"We also seized a large number of burning grenades from your soldiers who died."

"Once you charge, these burning grenades are enough to ignite your soldiers!"

“At that time, as a commander, you will see one burning fireball after another at the foot of the mountain, rolling down the hillside, and every fireball is your soldier of the Dragon Hall!”

“So then you will see with your own eyes that your soldiers were burned black charcoal one by one by your own burning grenades, piled up the whole hillside and the whole foot of the mountain!”

“At that time, the whole valley will be filled with the smell of burnt human flesh.”

“It may be very fragrant, but you just want to nauseate when you smell it, and even want to spit out your stomach!”

Speaking of this, Charlie sneered and shook his head and said, “Oh, what a sarcasm.”

“This kind of inhuman weapon is not prepared by us, but by you yourself delivered it to us!”

Ulysses Eisenhower seemed to have encountered a thunderstorm in his soul at this moment, and his whole body was stunned!

He's not used to seeing the wind and waves, he was scared by Charlie's words!

He has even imagined in his mind that countless soldiers in the Dragon Hall rolled down the hillside with a burning fire and screaming hoarsely.

At this moment, he felt as if he had seen hell.

Chapter 3220

He looked at Charlie in horror and blurted out and asked, “You... Who are you?”

Charlie smiled, "My surname is Wade, you can call me Master Wade!"

The government commander on the side was already scared.

He himself advocated peace talks.

Hearing these contents, he strengthened his views.

So he subconsciously blurted out, "Master Wade... If we withdraw our troops, can you leave the anti-armed camp and join the government army?"

"If possible, everything before can be written off."

"We will give Commander Hamid full autonomy, and even let him remain neutral in our fight against other armed forces."

"I wonder if Commander Hamid intends?"

The government forces themselves are very pessimistic about attacking Commander Hamid.

Therefore, they prefer to include Commander Hamid.

Because they very much recognize Commander Hamid's ability to fight.

If he can join the government army, it will be a good idea.

When Ulysses Eisenhower heard this, he immediately said angrily, "What do you mean? Don't forget that Commander Hamid still carries the blood debts of more than 2,500 brothers of the Dragon Hall!"

Charlie said indifferently, "You are welcome to collect this debt at any time."

"As I just said, our weapons and ammunition are enough to kill you 20 times, and the soldiers are forehand these days."

"If you are still a man, you'd better launch an attack immediately today."

"If you are a shrinking turtle, we can continue. If the deadlock continues, we don't care."

Ulysses Eisenhower's blood surged up. Thinking of the Lord of the Dragon Hall, Creighton Krueger explained his affairs, he shouted angrily, "The man surname Wade, go back and tell Commander Hamid, the length is ten days, the short is five days, I, Ulysses Eisenhower, must lead the troops to fight and kill all of you!"

The government commander was immediately anxious and blurted out, "Ulysses Eisenhower! What do you mean?"

Charlie laughed and said, "Can't you see this? They are deliberately destroying the peace talks between us, and they don't want us to join the government army!"

Ulysses Eisenhower didn't expect Charlie to tell his fundamental motives at once, and quickly covered up and said, "I don't want this!"

"It's your provocation step by step!"

Charlie ignored him and said to the government commander, "We have a fable in China."

"It is called a fight between sandpipers and fisherman profits."

"It probably means that a long-billed water bird wants to eat a fat river trout, but it is stuck in its mouth by the river trout."

"When the two sides are deadlocked with each other, the fishermen pass by here."

"Just put both of these guys in the bag."

Speaking of this, Charlie said again, "Now, you are the waterfowl, we are the river trout, and the Dragon Hall is the fisherman!"

"What they want most is that Syria will always be unrest, the government forces will never have a day of peace, and they will not have the ability to protect themselves."

"In this way, they can only cede the land to the Dragon Hall and ask for the help and protection of the Dragon Hall, so that they can maximize their interests in Syria."

Ulysses Eisenhower blurted out, "Don't talk nonsense here!"

"The terms of our cooperation with the government army is that the government army will assign our land to build a mercenary base after eliminating all opposition forces!"

"At that time, there will be no fight between sandpipers and fishermen and fishermen in peace and tranquility throughout Syria!"

The government commander frowned and said seriously, "Our cooperation agreement with Dragon Hall is indeed so."

"Only when we eliminate all the opposition will we give them land and let them establish bases in Syria, so the situation you mentioned does not exist."

Charlie sneered and said, "Oh, you are really stupid."

"Do you really think they will help you completely eliminate the opposition?"

"Only when Syria has been in turmoil and needs their help can they constantly demand all kinds of benefits from you!"

"Think about it again, if Syria is really at peace, can your government army accept it indifferently?"

"Is there such a powerful armed organization as the Dragon Hall in your territory?"

"At that time, even if the Dragon Hall does not break the contract, you will definitely break the contract, because our ancestors of China have long said that the place where they lie down, it allows others to sleep peacefully!"

"So, I dare to pack tickets with you."

"Even if Dragon Hall helps you clean up the opposition on the surface, after getting your 100 square kilometers of land, they will secretly cultivate new opponents and jump out and continue to oppose you!"

"Keep dragging you into the quagmire of war!"

“In that case, you will fall into a terrible civil war again, but that has nothing to do with the Dragon Hall.”

“At that time, Dragon Hall may find you again, and propose that you give them another 100 square kilometers of land, and they will help you clear out all the opposition!”

“If this goes on and on, you are like wounded soldiers covered in wounds.”

“The wounds have festered and healed repeatedly.”

“Under such inhuman torture, you will never be a healthy and strong man, you can only live in their shadow for a life time!”
