

I'm A Quadrillionaire chapter 1287

Chapter 1287

David was stunned when he saw the message Celia sent him.

'Aliens are heading to Earth with black-honed ships?

"The earth is in danger!"

At that moment, David's body was filled with violent energy after everything dawned on him.

To David, Earth was his weakness.

Anyone who touched it would die, no matter who they were.

Now, aliens were going to invade it again.

Plus, it was unlikely they discovered this unintentionally, so did it mean that he forgot to kill all of the Tuffin family members?

At this moment, David did not have the time to think so much anymore.

He only had one thought in his head. He had to go back to Earth right this moment to protect his family and friends.

It did not matter why the aliens had gone to Earth, David would not allow Earth's fate to fall into other people's hands.

However, the Royal Region was too far away from Earth.

It would take at least a month to reach Earth if he took the fastest ship: the Galaxy Warship.

'What should I do?'

David was panicking.

He was worried that when he finally went back to Earth more than a month later, Earth would be in pieces and it would not be the way he remembered.

If that happened, so what if he reached Eternal Realm? So what if he could wipe out the culprit? He could not turn back time.

If he could not protect his family, friends, and home, so what if he was at Eternal Realm? David was not ambitious, and he did not want to be the strongest man in the Milky Way. He also did not want to be the strongest in the universe.

The reason he worked so hard was to protect what he needed to.

'No! I can't let this happen!'

At this moment, he was furious. Since he just had a breakthrough and he did not have time to feel and realize it, an Eternal Realm energy burst forth from David's body due to his anger.

A golden light appeared outside his body and the light shot into the air. The light shined outside the courtyard David was staying in and shot straight to the void above Planet Royal. Then, it created a dazzling light that lit up the Royal Region.

As his Eternal Realm energy spread throughout the Royal Region, everyone felt as if they could not resist this heavenly force.

They were like ants under this terrifying energy and would be crushed to death at any second.

Everyone was shivering under David's Eternal Realm energy, their hearts filled with shock and fear.

The people on Planet Royal were no different.

They were the closest to David, so they would feel it stronger.

As they looked at the golden light shooting into the sky, the people on Planet Royal felt the planet they were on gradually sinking.

This was Planet Royal, the largest living planet in the Milky Way in terms of mass and size.

Even so, it could not endure this energy that suddenly appeared.

Nimbus and Wilfred were in the secret room, and they also immediately felt the vast and majestic energy.

'What is this?'

The two looked at each other and their eyes were filled with shock.

"Come, let's go take a look!"

After that, the two disappeared from the secret room.

Right now, they were panicking.

They thought the Nine-Headed Serpent Clan sent someone at Eternal Realm to come here.

If not, the energy exuded would not be so scary.

If this were the case, the Milky Way would be doomed.

Even if everyone in the Milky Way worked together, they would not have had a chance to fight back against such a strong enemy.

However, would the Nine-Headed Serpent Clan dare to ignore the Universe Convention and go against the Universe Enforcers?

If they dared to do so, why would they work with the Sangruil Sinners?

They would have long taken over the Milky Way and made it their own.

If there were not the case, there was also another possibility.

I'm A Quadrillionaire chapter 1288

Chapter 1288

That energy came from a Universe Enforcer.

However, the possibility of this being the case too small.

Even if a Universe Enforcer passed the Milky Way, they would not care about it.

The Milky Way was a low-tier civilization, and it was too unremarkable compared to the rest of the universe.

Unless there was a war that might destroy the entire Milky Way, the Universe Enforcer would not pay attention to them.

In all other scenarios, would be tough for a level 3 civilization to attract the attention of the Universe Enforcer.

Nimbus and Wilfred quickly exited the secret room with doubt in their hearts.

They immediately saw a dazzling golden light extending from the Royal Palace to the void far away above Planet Royal.

The two men also felt the planet they were on sinking gradually under the majestic energy. 'What is going on?'

At the same time, they remembered a sentence recorded in the Barlowe family history.

"The day Planet Royal sinks is the day an Eternal Realm is born."

This meant when Planet Royal sank, it would mean a powerhouse at Eternal Realm was born on Planet Royal.

An Eternal Realm did not come to Planet Royal.

On the contrary, someone on Planet Royal has broken through to Eternal Realm.

'Who?'

Nimbus and Wilfred felt their hearts shake.

On Planet Royal, David was the only partial Eternal Realm aside from the two of them.

'But David was recently injured, and how old is he again?'

'He's probably not over 300 years old.'

'Is it possible for him to break through to Eternal Realm at this age?'

The two were confused,

'Did David have a realization and break through to Eternal Realm after fighting the five partial Eternal Realms from Sangruil and the Nine-Headed Serpent Clan by himself?'

"This is too f*cking scary!'

As David was venting the brutal emotions inside his heart, the realization about Eternal Realm completed inside his brain.

At the same time, the system also explained to him what the Eternal Realm was.

'I see!'

He felt much better now.

When David reached Eternal Realm, his body and blood had sublimated.

No one could plant a slave mark on the home planet of someone at Eternal Realm, not even another person at Eternal Realm.

If they did it forcefully, they would receive intense feedback.

Moreover, the person at Eternal Realm could ignore the distance between two places, tear apart the void, and walk into another space. Someone at Eternal Realm, they could cross galaxies in a very short time.

Of course, there were a lot of others benefits for reaching Eternal Realm.

However, David was only concerned about these two points.

With this, no one could plant a slave mark on Earth. At the same time, if David wanted to rush back to Earth, he could tear the space apart, and walk into another the void to travel quickly. He could complete all of this in a very short time.

Thus, he was not so nervous anymore.

At this moment, David was not in a hurry to leave Planet Royal to go back to Earth.

According to the realization in his head, he still had things to do as the first person at Eternal Realm in the Milky Way.

He needed to tell the surrounding galaxies that there was someone at Eternal Realm in the Milky Way.

The energy in David's body was pushed to the maximum.

He then came to the void surrounding Planet Royal while following the golden light. At the same time, the golden light outside his body started to expand.

In about two to three seconds, it expanded to its maximum. Then, a giant golden David formed above Planet Royal.

At this moment, everyone on Planet Royal was staring blankly at the giant golden figure in the void.

They had the urge to worship this golden figure.

Everyone from Star Realm to Universe Realm was the same. Even Nimbus and Wilfred, two partial Eternal Realms, wanted to do the same.

This was an emotion that was coming straight from the depths of their soul.

The life of someone at Eternal Realm was not the same as others.

I'm A Quadrillionaire chapter 1289

Chapter 1289

“The Eternal Golden Body!”

Nimbus and Wilfred looked at the golden body above Planet Royal and muttered.

They dreamed of achieving this.

They could only do this once they reached Eternal Realm and sublimated their bodies.

This was also the symbol of Eternal Realm.

‘David had a breakthrough and became an Eternal Realm powerhouse.

‘How did he do that?’”

Nimbus always felt that he was the only one who had the potential to break through to Eternal Realm.

After all, he was the youngest person at partial Eternal Realm in the history of the Milky Way.

Not only him, but the others also thought so as well.

However, David’s appearance had broken this record.

Now, he had broken through to Eternal Realm one step ahead of Nimbus.

Nimbus did not know if he should be happy or disappointed.

David was at Eternal Realm, so the crisis regarding the Sangruil Sinners working with the Nine -Headed Serpent Clan had completely disappeared. He should be happy.

However, Nimbus could not feel happy. He kept feeling like David had taken away what should belong to him.

Mia and Astrid stayed outside the courtyard the entire time.

They instantly noticed when David exuded an Eternal Realm energy and rose into the void in a golden light.

They also watched David turning into the golden giant.

The light from his body illuminated the entire Planet Royal and Royal Region.

Mia’s level was too low, so she did not know what this was.

However, as the princess of the Milky Way Empire, Astrid had read about the Eternal Golden Body from books.

Only people at Eternal Realm could achieve this.

“H–How did David turn into a golden giant? H–How did he do that? Is this a combat skill?” Mia lifted her head and asked dazedly.

“Mia, that’s the Eternal Golden Body. D–David is now at Eternal Realm. He’s also the first person in the Milky Way to do so,” Astrid explained from one side.

“E–Eternal Realm?”

“Yes, Eternal Realm. A realm where one will become immortal and almost indestructible. It is

also a realm that all powerhouses look forward to, including my father.’

“Immortal? Indestructible? Is David already that amazing?”

“He’s not just amazing! If he meets those partial Eternal Realm Sangruil Sinners again, he can kill all of them with just a flick of his wrist.”

At this moment, Astrid’s heart was filled with shock.

Ever since she was small, she always heard that her father was the one who had the most potential in the Milky Way to step into Eternal Realm.

Of course, she believed this.

Now, David had reached Eternal Real before her father, leaving him miles behind.

‘Gosh!’

Mia was already numb.

Ever since she followed David, she had never stopped feeling shocked.

‘What kind of monster am I with?’

David was hiding in the Eternal Golden Body.

He tried to control it and found there were no problems.

It was just like how he would use his body.

As he felt the majestic power coming from the Golden Body, David figured he could crush Planet Royal with just one slap.

Planet Royal was not the same as other planets.

This was the center of the Milky Way and was also the living planet with the biggest mass. Its gravitational force was also much larger than other planet's.

After getting used to the Eternal Golden Body David spoke.

“My name is David Lidell and I've achieved Eternal Realm. From now on, I am the Master of the Milky Way and I will protect everything within the Milky Way. I will not spare anyone who comes here uninvited and disrupts the order of the Milky Way.”

The Golden Body spoke.

David's voice seemed to not be restricted by space. It went into the ears of everyone in the Milky Way.

However, he was not saying this to the people in the Milky Way. Instead, he was speaking to the other galaxies around the Milky Way.

A galaxy with an Eternal Realm powerhouse was not the same as one without one.

The ones without would need to rely on others' protection.

It would be out of the powerhouses' kindness, but they were not watchdogs.

Thus, they could not constantly monitor its planets, or might not even ever notice them at all.

In this scenario, a lot of uncertain factors would happen.

Just like the secret attack of Sangruil and the Nine-Headed Serpents.

However, if an Eternal Realm protector was around, it would not be the same because they would have the power to fight back.

I'm A Quadrillionaire chapter 1290

Chapter 1290

They would not rely on anyone for protection as they could just protect themselves.

While their strengths were almost the same, no one would be willing to offend someone at Eternal Realm.

If there was a choice, one had to kill an Eternal Realm in one go.

What did it feel to have an Eternal Realm watching you in the dark like a venomous snake that might even come up to bite

to bite you at any time?

No one wanted to experience that.

After all, the ones who could reach this step would usually not be alone.

As the first person to reach Eternal Realm, David needed to announce his sovereignty to the galaxies around him and state that the Milky Way could fight back now, so they better not come and offend it.

On a remote and secluded planet in the Milky Way.

King Moe of Sangruil, Severus, and the other Nine-Headed Serpents were using this place temporarily.

They were waiting for help from the Nine-Headed Serpent Clan.

A few days ago, Severus had passed the news back to the clan.

As soon as help arrived, they would attack the Milky Way Empire again.

They had to quickly take over the right to rule the Milky Way.

They were already at this stage, so there was no reason for them to give up.

They wanted to grow quickly and increase their clan's strength.

The most effective way was to make humans, the most efficacious creatures in the world, their food.

Moreover, the Milky Way was too eye-catching to just ignore.

The Nine-Headed Serpent Clan was scared to attract the attention of the Universe Enforcers.

Therefore, working with Sangruil would be their best choice.

If the Universe Enforcers found out, they could shift the blame to Sangruil.

'We're just here to help.'

Even if they would still be punished by the Universe Enforcers, it would not be as bad.

They would be able to endure the punishment.

Moe and the others were still in the Milky Way, so they heard what David said.

At this moment, everyone had looks of horror on their faces.

'David is at Eternal Realm?'

They could feel the terrifying energy from Planet Royal.

'Run!'

They then turned into shadows and sped toward Beast Galaxy without hesitation.

Even if they were at partial Eternal Realm and it was halfway to Eternal Realm, the gap between the two was huge.

Their strength was nothing in front of someone at Eternal Realm and they would not have the power to fight back at all.

David was at Eternal Realm, so there was no place in the Milky Way that was safe for them.

If they wanted to live, they should go back to Beast Galaxy as fast as they could. They would be safe as long as they were there.

Right after Moe and the others left, the Sangruil Sinners on the planet also started to flee, leaving a planet that was in complete disorder.

The countless humans on the planet started to kneel while worshipping the direction where David's Golden Body was in.

They had been living in hell the past days, and the thing that saved them was the voice just now.

Therefore, they would always remember it.
