

I'm A Quadrillionaire chapter 1477

Chapter 1477

Eira took Lorraine and left.

No one on the enormous tortoise had noticed her coming and going except Celeste and Lorraine.

If David spread his mind power, he would definitely be able to sense Eira.

However, they were in Star Kingdom now and Celeste had told him that mind power was something that only Sovereign Rankers could cultivate, and it was also necessary for surpassing Eternal Realm.

David's current strength was just a beginner Ruler Rank, so he could not expose his mind power to

anyone.

He should keep a low profile unless necessary.

Star Kingdom was like no other.

Level 5 civilizations like the Beast Galaxy had only heard of mind power but had never even seen it.

Therefore, no matter how David used it, he would not be discovered.

However, Star Kingdom was different.

There were a lot of powerful people here.

Once David exposed his mind power, it would definitely attract attention, and then they would try to figure out David's method of cultivating mind power.

If they could not get the answer they wanted, they would definitely use force.

David was not strong enough in Star Kingdom, and too many people could surpass him.

It was fine though, since David loved keeping a low profile.

He was not the kind of person who liked to show off.

Thus, from the moment the enormous tortoise entered Star Kingdom, David hid his mind power.

Fortunately, what Celeste said made David vigilant.

Otherwise, if he showed any trace of mind power just now, he would be discovered by Eira the Saint.

Then, the development of this matter would be beyond their control.

Eira would definitely take David away just like Lorraine.

However, the treatment waiting for the two of them would be completely different.

Lorraine would become the personal disciple of the four reputable elders of the Iridescent Sect, her status would soar, and she would go from rags to riches.

From now on, she could even be regarded as the number one, even in Star Kingdom.

She would even be the head of this year's seven high priestesses of the Iridescent Sect.

On the contrary, David would get indirectly interrogated about the source of his mind power and the method of cultivation.

If he could make something up to satisfy Eira the Saint, that would be fine.

If he could not, David may be subjected to various inhumane torture methods until he confessed the source of his mind power.

Therefore, after Eira left with Lorraine, Celeste was deeply relieved.

She was terrified that her teacher would discover David.

At that time, it would be tough for her to be caught in the middle.

Even if she wanted to help David, there was nothing she could do.

After Eira left, Celeste stood there for a while. Then, she sent a voice message to David, asking him to come over as she had something to tell him.

She was preparing to warn David again.

He had to keep a low profile and never expose the fact that he had mind power.

Star Kingdom was a scary place.

Even if she was a Sovereign Rankerk, what she learned was only superficial.

When David was still in his room thinking about his next plan, he heard Celeste's voice.

"David, come out, I have something to tell you."

"Okay, Celeste. Wait a moment, I'll be right there."

I'm A Quadrillionaire chapter 1478

Chapter 1478

After David finished speaking, he got up and went out. When he arrived, Celeste was already sitting there waiting for him.

"Celeste!" David called out.

"Sit!" Celeste glanced at David and said expressionlessly.

David stepped forward and sat opposite Celeste.

He looked at Celeste opposite him and could not help but think of the scene in the fantasy just now and how crazy Celeste was back then.

'Is she the same person as she is now?'

"Celeste, how can I help you?" David asked after sitting down.

"David, my master came here just now," Celeste said.

"Your master?"

"Yes! My master, one of the four reputable elders of the Iridescent Sect, is also a powerhouse whose strength has surpassed Eternal Realm and reaches Saint Realm. She's invincible even in Star Kingdom." 'Surpassed Eternal Realm?'

'Saint Realm?'

David also did not know much about the division of combat power in the universe.

He only knew that he was now a beginner Ruler Ranker in Eternal Realm.

Eternal Realm, like Universe Realm and Star Realm, also consisted of three ranks.

After Ruler Rank, there was Immortal Rank and Sovereign Ranker, and Celeste was a Sovereign Ranker. According to what Celeste said just now, Saint Realm should come after Eternal Realm.

Her teacher, the reputable elder of the Iridescent Sect, was in this realm.

What puzzled David was that he did not understand what did this had to do with him.

He had no fear nor respect for Saints because David felt that it would not be long before he could reach this level.

99% of the people would be stopped from progressing from Eternal Realm to Saint Realm, but it would not stop him.

As long as he had enough lavish points, David could easily bridge this gap that others could not cross. "Celeste, your master came here for you, so I don't think this has anything to do with me, right?" David asked, puzzled.

"It indeed has nothing to do with you. I called you here this time to warn you again. You must not expose your mind power in Star Kingdom. Even if you have to, you must take care of future troubles, otherwise, the consequences will be serious." Celeste said seriously.

"I see! Thanks, Celeste," David said.

He knew Celeste was doing it for his own good.

"No! You don't understand! David, mind power is not only important for those who are about to break

through Eternal Realm, but it is also the top priority for Saints. Once you reveal your mind power and let everyone know that you broke the rules by having such powerful mind power as a beginner Ruler Ranker,

you

will face the entire Star Kingdom's punitive investigation. They will demand you to hand over the method of cultivating mind power."

"Is it that serious?" David asked in surprise.

He did not expect to be attacked by the entire Star Kingdom if he revealed his mind power. This was too serious.

The key was that he did not have any method of mind power cultivation. He got his from the system.

If he was really attacked, what would he hand them?

'It seems that I still need to be low-key, low-key and low-key!

'At the very least, I can't expose my mind power before getting to Sovereign Rank.

'It doesn't matter after I become a Sovereign Ranker.

'Even if others find out then, it won't be too odd.

'After all, most of the Sovereign Rankers will have mind power, and it's just how much of it they have.

'Since I have more, I'll just say I'm talented.

'This explanation will be good enough.'

"It's only going to be more serious than this because mind power is too important in the later stages of cultivation, so all Saints will pay a lot of attention to it," Celeste said affirmatively.

"I understand. Thank you for reminding me. Starting today, unless I face a life-and-death crisis or reach Sovereign Rank, I will not reveal my mind power again," David expressed his sincere gratitude.

At this moment, David's view of Celeste had risen to another level.

Mind power was so important to powerhouses that were in Sovereign Rank or above, but Celeste never targeted David in the Milky Way when she discovered that he, who had just stepped into Eternal Realm, possessed such powerful mind power.

Even now, she had never asked David how he increased his mind power.

This would take a lot of willpower.
