

Read I Am A Quadrillionaire Chapter 2075

I am a quadrillionaire chapter 2075-After he watched David enter the space crack, the corners of Azul's mouth turned up in a sneer.

He was carefully sensing David's position.

After a while...

All of a sudden...

'Huh?

'He disappeared?

'Oh no!'

Azul thought David was going to run away.

Just as he was about to enter the space crack to chase David, a space crack appeared at the position David left just now and a figure walked out again.

Who else was it if not David?

Behind him was a hunched old man wearing a mask.

In the old man's hand was his weapon, the Ice Soul Excalibur.

'What happened?'

Azul frowned.

'At that moment, I couldn't sense this kid.

'Also, when did this old man come?

'If he can hide from my perception, it means that he's not weak.

'There must be treasures on him and that are not low level.'

Azul stared at the masked old man.

'Is this the guy who stole my sword?

'Very good!

'Now that the culprit is here,

'I should get ready to attack.

'How should I torture and kill these two?'

Azul was contemplating.

'As for my promise to David, to hell with it!

'If I kill everyone here, no one will know that I've gone back to my word.

'Anyone who dares to touch my sword must die!

'The reason why I promised David just now was that I was afraid his master will hide the sword in some hidden corner.

'The Ice Soul Excalibur is very important to me.

'Now David and his master are here with the Ice Soul Excalibur.

'Can they escape from me?'

The answer was obviously not.

The limit of the combat power of a level 7 civilization was peak Sacred Saint Rank.

Once someone ignited the Divine Fire and got to partial PreDeity Rank, Star Kingdom might upgrade to become a level 8 civilization.

Star Kingdom obviously did not have this strength.

Therefore, peak Sacred Saint Rank was the strongest combat power of Star Kingdom.

Not to mention that there were only David and his master here right now.

Even if there were two more peak Sacred Saints, could they stop Azul from killing them?

Even if Azul just woke up and had not returned to his peak, three or five peak Sacred Saints were not his opponents.

At this moment, Lorraine looked at David's side profile and her mind was blank.

What did she just see?

David used his own blood to summon a person exactly like himself. That person was no different from himself.

'What was that?

'It was simply unheard of.

'The master he spoke of is actually the clone he summoned with his blood.'

Lorraine was about to ask about this, but David immediately took her out of the space crack.

Hence, she did not have time to ask a single question.

She could only wait until after this crisis was averted.

'I hope that the fake master David summoned can scare the other party away!

'He looks pretty intimidating.'

"Azul, the Ice Soul Excalibur is here. Are you sure you will lead your people away after you get the sword and never step into the Star Kingdom again?" David asked seriously.
