

## Read I Am A Quadrillionaire Chapter 2163

I am a quadrillionaire chapter 2163-In the end, David bought the Beast Crystal inside the Silver Flood Dragon for 100 billion L Dollars.

Beanie stripped the Beast Crystal from Silver Flood Dragon and handed it to David while it was still warm. Then, David also transferred 100 billion L Dollars to Beanie.

After the deal between the two was concluded. David turned on the system immediately to check whether he had gotten the lavish points.

Fortunately, the result did not disappoint him. The system displayed a thousand lavish points clearly.

After this, David could return to the real world at any time and break through to Pre-Deity Rank.

David did not want the body of the Silver Flood Dragon worth 20 billion.

It was not that he did not want the two hundred lavish points.

Right now, he desperately wanted even a few measly lavish points, let alone two hundred.

It was mainly because he had no idea how to deal with it after he bought it.

Others needed the body of the Silver Flood Dragon to boost their mind power, but not David.

He could not just throw it away, right?

It would cause quite a stir if it was discovered by others.

When he arrived at Sole, there should be no shortage of places for him to spend money, so there was no need for him to take this risk.

And with a thousand lavish points in the system, David was not in a hurry anymore.

He still had time.

He could still spend money in the first-tier cities and even main cities.

In truth, David did not expect that when he came to The Spirit Cage. The little snake he killed so casually had created a harvest of 1000 lavish points for him.

After the deal between the two, the sky had turned dark.

Beanie decided to find a place to rest and then they would go to find the buyer of the Silver Flood Dragon's body in the morning.

The team then settled in an inn.

The environment was not bad, so of course, it was not cheap.

However, for Beanie who had just received 100 billion L Dollars, that was a small amount of money.

David wanted to pay the bill, but Beanie naturally would not agree.

Since it did not amount to much, David stopped insisting.

After telling Beanie that he was going to retreat at night and not to be disturbed, David went into his room and closed all the doors and windows. After he turned on the system, he chose to exit The Spirit Cage and returned to the real world.

When he opened his eyes again, he had returned to the Iridescent Sect in the real world from The Spirit Cage.

The first thing he did back in the real world was make a breakthrough in his strength.

His lavish points could only benefit him if he used them. If he kept them, they would just be a string of numbers.

David first spent two hundred lavish points to help his Body and Mind breakthrough from Sacred level 10 to Divine Realm Pre-Deity level 1.

Then, he spent ninety points to raise his Body and Mind each to Pre-Deity level 10.

In this way, he spent a total of three hundred and eighty lavish points.

Both his Body and Mind had reached Divine Realm Pre-Deity level 10.

Under the influence of the double limit, David's combat strength also reached partial Primordial Deity Rank.

This kind of combat power was not considered weak even in level 9 civilization Leila.

Azul, as the direct descendant of the Feather family in Leila, had awakened his innate skill but he was only a partial Pre-Deity.

After spending 380 lavish points from his 1000 lavish points, he only had 620 left.

David set his sights on Cloning again.

This was the most powerful skill he had ever seen.

His clone had the same combat power as his main body, which could be regarded as heaven-defying.

In the current situation where it was impossible to continue to improve combat power, it was undoubtedly the best choice to increase the level of his Cloning and increase the number of clones.novelxo.com fast update

David clicked on the plus sign behind the avatar.

The system window popped up.

[Cloning is currently a level 3 skill, and it will cost one hundred lavish points to upgrade it to level 4. After reaching level 4, the number of clones will increase from three to nine. Host, please confirm whether to proceed.]

There were two options.

Yes or no.

'My clones will increase from three to nine?'

David's eyes lit up.

'I thought that I would only get one clone every time I upgraded it by a level!'

'It seems that this is not the case.'
