

Chapter 764 The Salvation Society

Upon hearing this unfamiliar name, Liam found himself a little confused.

He asked, "What is the Salvation Society?"

Now, it was the mother and daughter's turn to be astonished. The mother couldn't believe it and exclaimed, "You've never heard of the Salvation Society? That's unbelievable! How did you even manage to get here?"

Liam shook his head, still bewildered, and replied, "I genuinely have no idea. I'm not from this island."

His words completely altered the mother and daughter's previous assumptions. They looked at him as if he were an enigma, leaving Liam feeling perplexed. He decided to learn more about this enigmatic Salvation Society.

After some information exchange, Liam eventually grasped his current location.

Simultaneously, he was astonished because this place had a connection to the primogem!

Chapter 764 The Salvation Society 🎁 +120 Points at most

This was an island known as Genesis Island, and the only power that held sway on the island was the Salvation Society.

At the periphery of Genesis Island lay an enigmatic barrier capable of segregating individuals who had not encountered the primogem's aura.

The native inhabitants of Genesis Island had organically assimilated this aura over time, granting them unrestricted access.

Regarding why Liam gained entry, he conjectured that it could be due to his prior absorption of the primogem's energy. Although he no longer possessed it, traces of its aura still lingered within him.

Due to this, the mother and daughter had mistakenly believed Liam to be a member of the Salvation Society who could harness the power of the primogem, leading to the misunderstanding.

Now that they understood Liam's background, the mother and daughter were in a dilemma. They had never encountered an outsider like him before and didn't know how to handle the situation.

After much thought, the mother said to Liam, "Since you have nowhere else to go right now, you can stay here to recover. When you're better, we'll report to the Salvation Society for further instructions."

In any case, they had both been his saviors, so Liam got up and expressed his gratitude.

Days passed quickly.

Obviously, the medicine provided by the mother and daughter had remarkable effects. In just a few days, Liam was able to get out of bed and move around.

However, he could only access a fraction of his true strength.

During these days, Liam didn't sit idly. He gained a basic understanding of Genesis Island's situation.

The island was divided into two major areas: the outer region, which was the common area, and the center, which served as the headquarters of the Salvation Society.

The common area was where the offspring of the Salvation Society had made their homes for numerous years. Although their lineage was not entirely pure, these individuals still had an opportunity to become members of the Salvation Society. The crucial requirement was successfully passing the Salvation Society's thorough examination.

As long as they passed the test, they could become members of the Salvation Society and relocate to the central area with their families.

Therefore, nearly everyone on the island shared the goal of joining the Salvation Society.

However, such opportunities weren't available every year. The Salvation Society stipulated that each person could only participate once every decade. As a result, those who did participate were typically those who had saved up enough confidence over the years. Learning all of this filled Liam with a sense of optimism.

This place was probably what the doctor had mentioned earlier. At the very least, the Salvation Society members should possess a deeper understanding of the primogem!

Looking back, the middle-aged man who had defeated him had likely also absorbed the power of the primogem, perhaps even more than Liam.

If Liam wanted to return and seek revenge, there was only one path before him now—he had to join the Salvation Society and attain even greater strength!
