

The Ex-Husband's Revenge By Dragonsky

Chapter 2044

Chapter 2044

The next morning, Leon went over to the Scammell Group and got Damian to help him find some supportive ingredients.

The motherwort and Nine Suns Flower he got the day before were incredibly amazing spiritual herbs. They needed to be accompanied by many other valuable materials to be made into pills. Only then would the effects be maximized.

After getting the materials, Leon returned home and started to refine the pills.

When he refined pills before, he was much faster since Iris and the others were helping him.

However, the girls were all already working in the company, so he was left at home alone. The speed of his pill-making was much slower.

Of course, he did not have anything special to do at that moment, so he had no problems with being a bit slower.

After that, he lit up the furnace and activated the Spiritual Pearl's power. The Spiritual Pearl immediately started to float in the air, emitting tremendous spiritual energy. That would support his pill-making and make it a lot more effective!

Once the time was ripe, he put the Nine Suns Flower into the furnace first.

Right after that, he took out the other materials he prepared, throwing them inside.

After a long time, as time slowly passed, the materials in the furnace started to fuse with the help of his spiritual energy.

After over ten minutes, a light buzzing could be heard. The materials within the furnace condensed into pills, and a faint wave of fragrance could be smelled.

"It's done!"

Leon looked happy as he walked over to open the furnace. There were twelve shining white pills within.

Those pills were named the Sun Pills. They could greatly bolster the power of martial artists that practiced Light Methods. The effects were no lower than the Cleansing Pills he used half an Angel's Fruit to make before!

After keeping the Sun Pills, Leon took out the motherwort and prepared to refine another pill.

After some amount of time, the second pills were done as well. A faint wave of fragrance could be smelled.

After that, Leon walked forward and opened the furnace. He saw that the situation was more or less the same, and twelve pills were made.

At that moment, he heard the sound of some cars stopping outside.

Right after that, the door opened. Iris and the others walked out.

They already got off work.

Other than the four of them, there were two more guests. One was Roanne, and the other was Roanne's bodyguard, John.

The girls walked over when they saw that Leon was making pills

"Iris, you're all back! Hey, why's Roanne here too?" Leon said with some surprise.

"Oh, it's like that. It'll be the weekend for the next two days, and we're off work. Roanne says that it's too boring being at home alone, so she asked to stay with us for the next two days," Iris explained with a smile.

Roanne was one of the shareholders of Elegante, she was on quite good terms with Snow.

Other than that, when Iris and Snow were ambushed before, Leon hurried to the Golans and was stopped by their experts!

Thankfully, Raonne managed to arrive in time and helped Leon top the Golans.

That was how Leon managed to save Snow!

It meant that Iris and Snow did owe Roanne quite a bit!

So, when Roanne said she wanted to visit, both Iris and Snow agreed incredibly quickly.
