

The Charismatic Charlie Wade Chapter 1671 – 1675

Chapter 1671

At this moment, Ito Yuhiko was sitting in his car and cursing.

Hiroshi Tanaka covered his face, and said with some nervousness and aggrievedness: “My President, Mr. Charlie is extremely powerful and acts extremely casually. At first, Yamamoto Kazuki only said the words sick man of East Asia in front of him, and he was beaten up. If you really intend to kill him, you still don’t know what kind of lethality will erupt, so even if you hit me, I will remind you from the bottom of my heart, don’t talk to this man Right”

Ito Yuhiko’s expression was extremely ugly.

He knows Koichi Tanaka.

This kid is loyal to him, even if he asks him to perform a caesarean on the spot, I am afraid he will not hesitate.

Therefore, what Koichi Tanaka said must be from the heart.

Thinking of this, Ito Yuhiko couldn’t help but wondered: “Could it be that that kid is so powerful? Even so powerful that Hiroshi Tanaka felt for a while that the patriarch of the dignified Ito family couldn’t even offend him?”

Yuhiko Ito frowned and asked Koichi Tanaka: “Then you tell me, what should I do now? Can’t you really just give him the 4.5 billions for nothing?”

“It must be impossible.” Tanaka Koichi said, “Chairman, the 4.5 billion USD we only paid Kobayashi Pharmaceutical were remitted through Ito Corporation’s public account. The bank has clear remittance records. Kobayashi Pharmaceutical did not pay the

corresponding shares for the 4.5 billion USD We can sue the court to demand that Kobayashi Pharmaceutical must return all the 4.5 billion USD We will definitely win this kind of lawsuit.”

“Fighting a lawsuit?” Ito Yuhiko’s expression was very gloomy: “You let me Ito Yuuhiko to fight with him? Go to the court and cry that this kid didn’t pay me the money?!”

Koichi Tanaka said seriously: “President, this is the safest way and the way with the highest success rate.”

“impossible!”

Yuhiko Ito said with a cold face and angrily said: “If the outside world knew that a young Chinese man would dare to take 4.5 billion USD and not return me, and I could not get him to return the money. Go to the court for help, where do I put my face? Where do I put the face of the entire Ito family? With this precedent, then other people can’t ride on my neck and sh!t?!”

Because the underground world is legal under the Japanese government, many Japanese families and consortia will get involved in the underground industry and even cultivate their own underground forces.

Chapter 1672

The Ito family is not only Japan’s top chaebol, but also the top power of Japan’s underground world.

There are three strongest underground organizations in Japan. The Yamaguchi group ranks first, and the Ito family ranks second.

The underground world is a world where the weak is eaten by the strong, and the most important thing to survive in this world is to stay strong.

For people in the underground world, sometimes it is not that they are cruel, but the law of survival forces them to be cruel.

If you have been implementing the principle of whoever beats you, you will dare to fight hard, and over time, no one will dare to provoke you.

But if you don't go back after being beaten once, but swallow your anger and admit that you are unlucky, then from this day onwards, everyone in this world can come to bully you.

Moreover, there is another very important criterion for surviving in this world, that is, no external force can be used to solve problems.

If a person in the underground world asks the police and the court for help, that person will immediately be disgusted and rejected by the entire underground world.

Therefore, what Ito said, he couldn't get back the 4.5 billion USD through legal means. He had to let Charlie honestly and intact, and return the money to the Ito family's account.

Therefore, he gritted his teeth and said: "There are only two solutions to this matter. The first one is to let Wade, and honestly return the money to me, and this matter must not be disturbed. Everyone knows it; the second one is to kill him directly!"

Hiroshi Tanaka said with some anxiety: "I, I am worried that Mr. Charlie will not agree to your request."

Ito Hirohiko snorted coldly: "No? If you don't agree, choose the second plan and kill him!"

Although Koichi Tanaka didn't know how powerful Charlie really was, he always felt that Charlie was extraordinary.

And Charlie is not only strong, but also the key means seems to be very powerful. Otherwise, how could Ichiro give him all the shares of Kobayashi Pharmaceutical 90?

Therefore, he felt that they should try to avoid the conflict with Charlie as much as possible, otherwise, he might cause a big trouble.

So, he hurriedly changed the topic and said, "Mr. President, I don't think you should worry about Kobayashi Pharmaceutical's 4.5 billion USD now. The money will definitely not run away. It's just a matter of coming back early or late. Don't forget, the Chinese Eastcliff Su family will be coming soon!"

Ito Yuihiko frowned and asked: “Did the Su family say that the specific day has come?”

“No.” Tanaka Hiroshi said: “They said they would come at any time. After all, the trip is a private jet, you can fly anytime you want.”

After speaking, Tanaka persuaded: “My President, the Su family is not only watching this opportunity, but also the Takahashi family. I heard that the Su family came here this time. Choose one of the Takahashi family to be a partner. At this time, you must not make any extravagance!”

Yuhiko Ito gritted his teeth and nodded, and said: “In this case, I will bear the wave of the kid named Wade, and you will keep an eye on him. If he does not leave Japan for the time being, then I will leave him alone. Take down the Su family cooperation first!”

Chapter 1673

Thinking of the Su family’s cooperation, Ito’s expression looked a little melancholic.

Sitting in the car, he sighed and said with emotion: “Koichi, in the past ten years, the speed of our national economy has been relatively slow, so the strength of several top families, including our Ito family, has shrunk somewhat. And the successor is weak...”

Hiroshi Tanaka hurriedly asked: “My President, We once led the world in its development speed in the decades after the war, why hasn’t it kept up with it in the past decade?”

Ito said with regret: “There are many reasons for this lag in economic development, firstly because Japan’s local resources and land have been very scarce; secondly, because Japan has not made major innovations in the Internet and high-tech fields in recent years.”

With that, Ito Yuhiko continued with emotion: “You see, many Japanese companies that had advantages in various fields more than ten years ago have gradually lost their original advantages in these years;”

“Look at the previous companies such as Sony, Panasonic, Hitachi and Toshiba. They are all in the world. I think that Sony’s color TVs were the best in the world and sold all over the world. Sony Ericsson’s mobile phones were also World-renowned, Panasonic

and Hitachi's home appliances, and Toshiba's semiconductors are all top-class in the world, but what about now? All are gradually declining!"

"Most of the TVs in the world are produced in China, which are cheap, affordable and cost-effective; the world's mobile phones are divided into two parts, the United States' Apple occupies a large part, and the remaining large part is China's Huawei, Xiaomi, Vivo and Oppo. What about Japanese mobile phones? Even South Korea's Samsung is absent, and it's already decadent!"

Koichi Tanaka couldn't help but feel frustrated: "Mr. President, you are right. We in Japan have indeed completely lost many traditional advantages, especially in electronic products..."

Ito sighed: "More than electronic products? In addition, Japan's steel industry was once the world's top, our special steel, even the Americans have to look up, but because Kobe Steel was exposed to a long-term fraud scandal. , And it plummeted!"

"Originally, Japan's Shinkansen technology was the world's best. High-speed rail technology was invented by us. The strength was unique in the world. But who would have thought that China's high-speed rail would come to the top, so that our Japanese high-speed rail technology and the high-speed rail technology of Germany and France all Decreased into the second-rate in the world, Japan's Shinkansen has also lost a lot of overseas markets..."

Koichi Tanaka also kept sighing: "We, the Ito family, hold different proportions of shares in the companies you mentioned. They are lonely, and our assets are shrinking. This is indeed a very serious problem... ."

Yuhiko Ito hates that iron cannot be made into steel and said: "Not only that, but the most important thing is that our young people in Japan are seriously lacking in creativity as a whole!"

"Look at China in the past few years. A large number of world-class Internet companies have been born, such as Tencent, Alibaba, Toutiao, JD.com and Pinduoduo, as well as DJI drones that account for more than 70% of the world's drone market. In contrast, Japan has never had an influential Internet company in recent years! If we continue to develop like this, we will lose all our advantages!"

Hiroshi Tanaka nodded: "In contrast, the top families in China, with the continuous development and progress of all walks of life, their wealth and influence are also increasing. They now have the ability to directly challenge Europe and the United States. They don't put Japanese companies in their eyes at all."

"That's it." Ito said with melancholy: "Before, they were still chasing us. As a result, in the blink of an eye, they surpassed us and chased the United States, but we were left behind by them. In the back of our heads, so that we now want to make a breakthrough in business, we have to turn back to please the Chinese family. It really responds to the old Chinese saying, 30 years in Hedong and 30 years in Hexi... ."

Speaking of this, Ito Takehiko seriously said: "Because we have been stagnating and China has been developing rapidly, we now need to be firmly tied to China's top families. This time the Su family's cooperation is right. For us, the significance is very important and should not be lost."

Hiroshi Tanaka nodded in a hurry and blurted out: "President, please rest assured, I will definitely go all out!"

The Japanese economy has been sluggish in recent years.

Chapter 1674

As Japan's top chaebol, the Ito family is constantly being weakened.

Also confused with them, there is another big family in Japan, the Takahashi family.

Both companies are now actively seeking breakthrough points, so they all pin their hopes on top Chinese families.

As the top family in China, the influence of the Su family has been continuously increasing in recent years, and with the rapid development of the Chinese economy, the strength of the Su family has also been soaring.

The focus of the Su family in the past few years has been on maintaining and consolidating the domestic market. After consolidating its position as the first family in China, it has only begun to turn its attention overseas in the past two years.

Therefore, in recent years, many Japanese families and chaebols are eager to develop in-depth cooperation with the Su family.

Over the past ten years, China's import and export trade has continued to grow, shipping demand has increased, and port construction and development have been extremely fast. Now, China accounts for seven of the world's top ten ports in terms of throughput.

Today's global trade relies very heavily on shipping. The vast majority of oil, ore and various goods rely on ocean transportation.

For example, the oil in entire East Asia and Southeast Asia is almost transported from the Middle East to ports by giant tankers;

Entire East Asia and Southeast Asia's iron ore also depends on a large number of giant freighters, transported from Australia and Brazil.

The Su family has been in the port business for many years and has its own industries and shares in major domestic ports. It is now preparing to build Asia's largest shipping company and build Asia's largest shipping fleet, which can just match their domestic ports for resources Complementary.

In order to build the largest shipping fleet in Asia, the Su family not only invested heavily on their own, but also prepared in-depth cooperation with consortiums in Japan and South Korea, giving them a certain share and letting them participate in depth.

The reason for winning the consortium of Japan and South Korea is mainly because Japan and South Korea are both developed countries, and the demand for shipping is also very large. In addition, South Korea's Busan Port, Japan's Tokyo Port, and Yokohama Port are all established large ports in Asia.

If the Su family can also hold the resources of these ports, by that time, the shipping company headed by the Su family can control the lifeline of entire East Asia to a certain extent, and the future profit space will be huge.

The Japanese and South Korean consortiums are extremely excited about this news. They all hope to reach a cooperation with the Su family and then get on the boat of the Su family.

In Japan alone, there are at least a dozen families and consortia that hope to cooperate with the Su family.

Among them, the strongest ones are the Ito family and the Takahashi family!

Chapter 1675

In the afternoon, Charlie expelled nearly half of the entire staff of Kobayashi Pharmaceuticals in a desperate manner.

Originally, those people from Kobayashi Pharmaceutical were still thinking of using a strike to fight against Charlie, but he didn't expect that Charlie was not at all soft to them, and they all fired them, leaving none.

This incident caused a huge earthquake in the Japanese business community!

First of all, no one thought that Kobayashi Pharmaceutical, which is an excellently developed company, would change ownership. Now 90% of the shares have been transferred to a Chinese and it has become a Chinese company.

Secondly, no one thought that after Kobayashi became a Chinese company, it would kill half of its employees in one go!

In Japan, apart from bankruptcies, very few companies will suddenly expel so many people.

Especially for manufacturing companies like Kobayashi Pharmaceutical with nearly 10,000 employees.

If half of them are fired at once, four or five thousand people will be fired!

Moreover, except for the employees in the production positions, the R&D, promotion and sales positions were all laid off. This operation method makes everyone feel incredible.

In their view, this method of layoffs is tantamount to abolishing martial arts.

But Charlie didn't care.

What he needs is not the brand of Kobayashi Pharmaceutical, nor the reputation and patents. What he needs is only the production line of Kobayashi Pharmaceutical.

As long as Kobayashi Pharma honestly produces JX Weisan for him according to his requirements, that is the greatest value of Kobayashi Pharmacy at this stage.

The rest of Kobayashi Pharmaceutical that has not been expelled are all the people in charge of the production line.

Immediately afterwards, Charlie immediately held a meeting at Kobayashi Pharmaceutical, appointing Liang as the general manager of Kobayashi Pharmaceutical and Ichiro as the deputy general manager.

At the same time, Charlie also very clearly warned the remaining people in charge of the production line: "You people in charge of the production line will listen carefully. If you work for me honestly, listen to me and do things according to my instructions. Then your job can be retained and your income can be guaranteed. What I can promise you is to follow me honestly and I will make your income never lower than before."

As he said, Charlie turned around and shouted sharply: "But! If anyone among you dares to play with me carefully, dare to fight against me, then I am sorry, I will immediately kick you out of Kobayashi Pharmaceutical!"

When the people who stayed heard this, they immediately acted like tamed wild dogs, and honestly didn't dare to say more.

When the group is angry, everyone wants to fight, because they feel that when everyone is tied together, Charlie must not dare to do anything to them. After all, he certainly does not want Kobayashi Pharmaceutical to be paralyzed suddenly.

But what everyone didn't expect was that Charlie didn't play cards according to the routine at all. Before everyone was tied together and confronted him, he had already driven out half of the people!

This immediately caused all the people who were evicted and their families into a serious economic crisis.

Therefore, how can the remaining group of people dare to have any thoughts of making troubles, to keep the job and to ensure that the salary is not lower than before, which is to ensure that their family life will not be affected in any way and let them completely relax.

At this time, how can they have the least thought of confrontation?

As a result, a group of people quickly surrendered and decided to continue working for Charlie's Pharmaceutical company.
