

# The Charismatic Charlie Wade Chapter 2651

## Chapter 2651

Fifteen minutes after taking off, Charlie only had the last few tens of kilometers to the destination.

According to Vasily's calculations, Charlie should jump out of the cabin after 5 minutes, and then use his remote guidance to land five kilometers away from the destination.

So he asked Charlie, "Mr. Wade, are you ready?"

Charlie nodded: "Ready."

Vasily said to Chester, "Mr. Chester, please ask the captain to open the hatch."

"OK!" Chester immediately walked to the cockpit and asked the captain to open the door at the rear of the plane.

When the cabin door opened slowly, a violent cold wind poured in instantly, and Issac and the others shivered.

Issac hurriedly said to Charlie loudly: "Master! You must be careful and vigilant! After six hours, we will definitely be waiting for you at the place you specify!"

Charlie smiled slightly: "Don't worry, we will meet in 6 hours!"

At this time, Vasily accompanied Charlie to the open hatch. Everyone looked at Charlie with breathlessness. This was his first parachuting. Not only was it extremely difficult to parachute, but also the real difficulty began after landing.

Except for Issac, no one at the scene could figure out what kind of self-confidence Charlie had that would make him dare to go deep into mad Tiger's Lair guarded by thousands of soldiers. This kind of hell-level difficult task, even an imaginary hero in a movie would not dare to take this task.

Therefore, each of them was squeezed by Charlie's safety concern.

Chester even felt that this matter would most likely end with the Wade family paying a large amount of cash to the opposition and redeeming Charlie from them.

However, Charlie's face was light and breezy.

Five minutes have passed, and Vasily said to Charlie, "Mr. Wade, you can jump!"

Charlie was indifferent, and said lightly: "Wait."

Vasily said nervously, "Mr. Wade, we can't wait any longer. Our flight speed is still very fast. If you wait any longer, your landing point will deviate greatly. If the landing point is more distant from the opposition base If you are close, then you will be in a very dangerous situation! And, the closer you are, the bigger your goal after opening the umbrella!"

Charlie smiled and said, "Time is urgent, so it's better to get closer."

Vasily looked at the time and blurted out: "Mr. Wade if you jump now, the distance may only be three kilometers! Can't wait any longer!"

Chester also said nervously, "Yes, master! If you wait, you will jump on top of the opposition base!"

Charlie looked at Vasily and asked him, "If I want to land one kilometer away from them, when is the best time to jump?"

Vasily swallowed, and said with difficulty, "If you really want to control one kilometer or so, then you have to wait another 30 seconds..."

"Okay!" Charlie nodded and said, "You help me count down. After 30 seconds, I will jump out on time!"

Vasily wiped away the cold sweat, and stammered, "In that case...it's really...it's too dangerous..."

Charlie smiled and said: "It doesn't matter, don't I still have a surrender letter on me? If it doesn't work, give them this letter, just as spending money to experience extreme sports."

Chester sighed helplessly.

He saw Charlie for the first time, and at this moment he only felt that Charlie was simply unheard of dude.

He has seen the second generation of super-rich come out all over the world to spend money to play with w0men for fun, but he has never seen the second generation of super-rich like Charlie who comes out to spend money to die.

Vasily kept staring at the stopwatch in his hand, and when the last 10 seconds were left, he started the countdown.

"10, 9, 8, 7..."

At this time, the hatch was fully opened, and there was a thick cloud outside the hatch.

## **Chapter 5652**

Although Syria also belongs to the Middle East, the latitude here is similar to that of Aurous Hill, and it is also wintertime, so it is the most rainy season in Syria.

Thick dark clouds not only block the sun but also make the air very humid.

This is a good thing for Charlie, because if today was cloudless, then the possibility that he wanted to parachute in during the day is almost zero.

That's why he is confident that he can skydive closer to the opponent's base.

When Vasily counted to the last three, Charlie stepped forward and went straight to the edge of the hatch. Vasily became more nervous and shouted, “3, 2, 1, jump!”

Charlie turned around and said to a few people, “Everyone, see you in six hours!”

After all, he jumped directly outside the cabin door without hesitation, and the whole person jumped into the thick clouds.

As soon as Charlie jumped out of the cabin, he felt as if he was in an ice cellar.

At an altitude of more than 5,000 meters, the temperature is a full 30 degrees Celsius lower than the surface. The current ground temperature is about 15 degrees Celsius above zero, so the temperature around Charlie is about 15 degrees below zero.

But this is nothing to him, his attention now is all focused on keeping his figure stable, so that he will not lose control of his body in a rapid fall.

Because he was in the thick clouds at this time, he basically couldn't see the situation below. Fortunately, he could hear Vasily's voice reminding: “Mr. Wade, the descending speed and direction are very stable, The clock is about 50 meters, please keep it. It is estimated that the height of the parachute will be safely opened after a minute and a half.”

Charlie shouted: “Okay, I get it!”

Ten seconds later, Charlie's body finally passed through the clouds.

At this time, a small number of raindrops have begun to condense under the clouds, and it seems that rain will form soon.

Charlie can see almost all the endless mountains below him, and the mountains in the Middle East are really what is the scenery at all. Looking at it, it is almost yellowish, and because of the plateau, some of the tops of the mountains are higher. There is still white snow on it.

Charlie can already vaguely see that there are relatively simple villages in the valley below him. Although they are far away, he can still see that the houses in these villages are almost all low earth houses. The degree of poverty is evident.

As the distance got closer and closer, Charlie could see the village, surrounded by two mountain peaks on the east and west sides, and there is an entrance to the village in the north and south.

And at this north-south entrance and exit, there are some armored vehicles parked, as well as man-made trenches and shooting piles. It can be seen that these two entrances and exits are the top priority of the opposition armed defense stationed here.

In the very center of the village, there is a small circular square on which 4 helicopter gunships are parked.

In addition, above the mountain peaks on both sides, you can also see the man-made fortifications and observation decks, and vaguely there are personnel activities in the fortifications.

Charlie had already made a quick judgment in his mind at this time. He is alone and must sneak into the other side's hinterland quietly, so the north and south entrances were definitely not a choice.

The most suitable entry point is the peaks on the east and west sides.

For the opposition parties stationed here, they are also very clear that the government forces do not have the capability of large-scale airstrikes. If they really want to attack them, the greatest possibility is to attack them by land.

There are mountains on both sides of the east and west, and there is no way to go. Even if soldiers sneak in from here on foot, it is very difficult, not to mention the heavy equipment.

So the government forces really want to attack, they can only enter from the two entrances, the north, and the south.

Because of this, the opposition's defenses on the east and west sides are relatively weak, basically only equipped with a small number of soldiers, a small number of heavy machine guns, and stinger missiles.

Sneaking in from here, Charlie is very sure that he will not be discovered, and even if he is discovered, there will be no danger, because the anti-aircraft ability of the heavy

machine gun is very weak, not only can the bullets not hit high, but also is affected by the gravity force. It's basically a parabola.

As for the Stinger missile, although this thing is very powerful, it can only lock the aircraft itself, and cannot lock the living person, so in front of Charlie, it is equivalent to waste!

At this moment, Vasily's voice came in Charlie's earphones, and he said, "Mr. Wade, according to your current descending speed, you will have to open your umbrella in ten seconds!"

Charlie glanced at the information on the watch. After ten seconds, the height of the umbrella was about 500 meters. For the sake of caution, he wanted to choose the half-mountain on the east side as the landing location, so that he could avoid the top of the mountain directly. Defensive position, so he opened his mouth and said: "I want to open the umbrella at a height of 200 meters."

"Two hundred meters?!" Vasily blurted out, "Opening the umbrella at this height, let's not say that you will fall under the nose of the defensive position on the top of the mountain. Your descent speed alone will not have enough time to buffer and land. The strength that the body endures at that time is almost equal to jumping from the height of seven or eight stories without any protection, it will be life-threatening!"

## **Chapter 5653**

The height of seven or eight floors is almost a deadly height for most ordinary people.

But for Charlie, it really isn't a big deal.

His only worry is that when his height gets lower and lower, he will first descend to the height of the mountain top. The most important thing is whether he will be discovered by the other party at this height.

In order to be sure, he put his hand into his pocket and grasped the thunder warning in his pocket.

This thundering order used the Wannian Lightning Strike Wood sent by Warnia, which can be called the highest quality of the lightning strike wood, and Charlie's most seized weapon.

Although he had used this shocking thunder for many times, and there were already many cracks on its surface, but at present, it can be used at least a few times.

Charlie didn't really like to use the Thunderbolt, because every time this thing made a lot of noise, but this time, he still planned to use the Thunderbolt to increase his success rate.

At this time, the whole mountain area was quiet. There were few people here, and there were almost no vehicles on the road. People below could hear the wind and the not-so-big rain, but there was no other sound.

But at this moment, in the western sky, a lightning bolt like a whip of God suddenly lit up!

This lightning slammed on the top of the mountain in the west, slicing several soldiers in the fortifications into coke on the spot!

Followed by a deafening thunder!

The rumbling of thunder resounded as a missile exploded, and it reverberated throughout the valley.

On the plane, Chester was taken aback by the explosion. He blurted out, "Damn it! In places like the Middle East, how can there be thunderstorms in winter?!"

The skydiving expert Vasily, because of his professional requirements, is also a meteorological expert. Even he has a dumb face and muttered: "This...this is not scientific...I studied it deliberately I have retrieved today's satellite weather map, and today's weather conditions do not exist for the formation of thunderclouds!"

The crew also didn't understand.

The crew of this aircraft is extremely experienced pilots, but all experienced pilots must be most of the meteorologists and well-informed meteorologists.

They have a good understanding of the formation of various climates and weather, and they can basically know what the situation is at a glance.

But no one thought that this kind of winter rain cloud, even a moderate rain could not fall, how could a sudden thunderstorm occur.

Only Issac heard this loud noise and felt a lot more at ease. He knew that this thunder must be caused by Charlie!

At this moment, all opposition soldiers, local villagers, and even 8 hostages, including Melba, were also shocked by the sudden explosion of thunder!

For these people, the noise of the thunder just now was so great that they had hardly encountered it in their entire life.

Many people have tinnitus in their ears because of this explosion.

If the eardrum is slightly fragile, you will feel severe pain deep in the ear.

Except for the imprisoned people, almost everyone else walked out the door for the first time, or turned their heads, and focused their attention on the West Mountain where the thunder and lightning occurred. The few soldiers who survived on the top of the West Mountain were also in panic and reported through the intercom The specific loss situation.

After hearing the news that five soldiers were killed by lightning, the entire opposition was shocked from top to bottom.

They have never encountered such a terrible thing. A bolt of single lightning can kill five people. How powerful is this lightning?

Most of the soldiers thought it was the anger of the gods, and many people knelt on the ground without hesitation and bowed to pray for the gods' forgiveness.

Unlike most soldiers with no educational level, the leader of this opposition armed forces was an intellectual who had studied at a military academy. When he heard the message, he immediately realized that the reason why the fortifications on the top of the

West Mountain were struck by lightning must be Because of their higher terrain, they have a lightning rod effect.

Therefore, he immediately ordered all the soldiers in the mountain top fortification to hide in the fortification to avoid another lightning strike.

This further helped Charlie. After receiving the message, the soldiers on the eastern mountaintop all shrank into the bunkers inside the fortifications, not daring to show up for fear of being struck by lightning again.

The soldiers on the top of the eastern mountain hid while others were staring at the west and were horrified. In the gray sky, an unremarkable figure fell from the eastern sky of the base at an extremely fast speed.

## **Chapter 5654**

However, at this time everyone, including the soldiers on the eastern mountaintop, focused their attention on the west, so no one noticed the passing of this figure.

And this figure is Charlie who jumped down from an altitude of more than 5,000 meters!

At this time, Charlie's descending speed was extremely fast, and his descending speed exceeded fifty meters in one second.

Vasily on the plane stared at the data uploaded by the computer and said palely: "Mr. Wade's descending speed is too fast...and his remaining ground height is less than 300 meters. This is far below the minimum limit for the safe opening of the umbrella.

When Chester heard this, his whole body trembled in shock, and he blurted out, "Let the young master open the umbrella!"

Vasily recovered, and blurted out, "Mr. Wade, open the umbrella! Open the umbrella!"

While speaking, Charlie had already skimmed over the top of the mountain at high speed and fell towards the mountainside.

He was not in a hurry to open the umbrella, because he knew that when he didn't open the umbrella, the goal was so small that it was difficult to see clearly.

But once the parachute is opened, a huge parachute will be released in an instant. In that case, the target will be magnified ten times or even dozens of times.

Therefore, he must make sure that the time for opening the umbrella is as short as possible!

In other words, he hopes to open the parachute at the lowest altitude, and then use the fastest time to reduce the speed of his fall to a height that is safe enough for him, and then finish the landing quickly, and then parachute immediately after landing. Put it away so that he can avoid detection to the greatest extent.

Seeing that there were only two hundred meters left from the ground, Vasily realized that Charlie was still descending rapidly, and realized that he had not opened the umbrella, and couldn't help but blurt out: "It's over... this height must be certain. His body will be broken to pieces..."

Chester was frightened by his words.

He had already prepared to inform the old man to prepare for the ransom and save Charlie back, but he never expected that Charlie would fall to death because of parachuting.

If this is really a fall, he will definitely be to blame!

Just when the two of them were panicking, Charlie suddenly opened the parachute.

The huge parachute was released from the umbrella bag at once, causing Charlie's rapidly falling body to be yanked back by a strong force.

Suddenly opening the umbrella at such a fast speed slows down, even if the average person does not faint, at least they will break a few ribs because of the huge inertia.

But Charlie filled the bones of his whole body with spiritual energy, his shoulders suddenly exerted force, abruptly holding the huge reaction force.

Immediately afterward, his descent speed from more than 50 meters per second, in a very short period of time, reduced to about 20 meters per second.

However, this speed is far from the safe speed for skydiving.

Normal people parachuting, the descending speed when landing is lower than six meters per second.

But at this time, Charlie was still less than fifty meters away from the ground.

Falling at this speed is almost the same as falling.

Fortunately, in the remaining 50 meters, the descending speed is still decreasing due to the effect of the parachute.

Immediately afterward, Charlie gathered all his true energy into his legs, and his whole person slammed into the ground at a speed of more than ten meters per second.

Vasily on the plane did not dare to look at the data returned on the computer, because he knew very well that after a second or two, Charlie's heart rate would drop rapidly until it falls to zero.

However, he never dreamed that when Charlie had completely stopped falling, his heart rate would only be faster than just a dozen times per second.

He looked incredulous, and blurted out, "Mr. Wade, you... are you still alive?!"

At this time, Charlie had already begun to quickly put away the parachute. While he stuffed all the parachutes into the parachute bag, he said lightly: "Don't worry, I have landed safely!"

## **Chapter 2655**

Hearing Charlie's reply, several people in the cabin were shocked to speak.

Vasily's views of the whole person have been completely subverted, and he subconsciously said: "This...how is this possible..."

Although Chester breathed a sigh of relief, he was equally shocked and said, "Vasily, could it be you who miscalculated the information?"

"Impossible..." Vasily said confidently, "I have been skydiving for so many years, and I have never made a mistake in the calculation of the data!"

Chester frowned, "Then I really can't figure it out..."

At this time, Issac, who had not spoken, said: "Don't worry, the true strength of the young master is much stronger than you think! We will go back with peace of mind and prepare to meet the young master at the predetermined place!"

Immediately, the transport plane made a large circle in the air and began to return to Beirut, the capital of Lebanon.

But Charlie concealed his figure and breath all the way, in the fastest time, all the way from the middle of the mountain to the foot of the mountain.

Because of the thicker rain clouds, the lighting conditions are getting worse. Although it is only in the afternoon, the visibility is almost the same as after the sunset.

Such lighting conditions further reduced Charlie's chances of being discovered. Coupled with the thunder blast that killed several soldiers, all the opposition soldiers were a little restless, so the vigilance around them was naturally greatly reduced.

At this time, the village where the reactionaries were stationed was no more than a step away from Charlie.

He could even see the densely arranged bullet holes on the low walls of the village where the yellow soil was piled up.

Since the entire village is located in a narrow valley, the buildings of the village are divided into crescent-shaped sections. The outermost buildings are almost surrounded by a wall of nearly two meters high. The village only leaves one south and two entrances to the north.

At the entrance and exit of the village, there is a Middle Eastern-style stone arch, guarded by soldiers on both sides.

Outside the village, many soldiers carrying guns and live ammunition walked back and forth along the wall, and on the roofs of many earthen buildings in the village, there were many sentries carrying AK47s.

However, Charlie could see that the soldiers patrolling and standing guard were relatively loose as a whole, and most of them just paced back and forth with their guns in hand and were perfunctory.

In fact, this group of opposition forces, although their individual combat strength is average and their weapons and equipment are not advanced, but their combat experience is very sufficient.

The more combat experience you have, the easier it is to make empirical mistakes.

They have gone through all kinds of wars, including encirclement and suppression, encounters on narrow roads, and decisive battles, but they have never experienced individual infiltration.

Regardless of whether it is the government, the opposition, or the Kurdish armed forces, the biggest drawback is that the combat effectiveness of individual soldiers is not good, and the energy of one person is really limited, so everyone is operating in groups, no matter how bad it is, there are seven or eight people and two or three heavy machine guns. In the pickup truck, no one has a pit in his head and a person goes deep into the enemy's nest alone.

Precisely because they had never experienced such a thing, when they were defending, they did not regard individual penetration as a defensive focus.

Their energy is used to monitor whether the government has sent large-scale motorized troops, whether it has sent warplanes, whether it has deployed heavy artillery at long distances in advance, and they are not so concerned about the situation other than these.

Charlie found the patrol team's gap and quietly touched outside the fence in a very short time.

The point he chose was relatively lax, and it belonged to the blind spot of the sentries on both sides of the building and was the best breakthrough point.

Charlie, who was as light as a swallow, jumped outside the wall, and the person directly climbed over the wall and landed on the inside very quietly.
